

DIFFERENTIAL DIAGNOSIS

FEBRUARY 9, 8:30AM – 5:00PM

**Differential
Diagnosis of the
Abdomen:
Screening for
Viscerogenic
Referral Patterns
to Shoulders,
Spine, and Hips**

- ✓ Improve your clinical reasoning with better differential diagnosis skills and screening tools
- ✓ Learn viscerogenic pain referral theory and referral patterns
- ✓ Recognize and screen the signs and symptoms of systemic disease and medical conditions that can mimic musculoskeletal problems
- ✓ Identify red and yellow flags to differentiate when conditions are outside of your scope of practice and when to refer out to a medical specialist

Course will include pathology of the abdominal contents. Participants will learn hands-on screening tools for differential diagnosis of abdominal pathology. This course will include lab participation and new assessment tools to help the you determine if its musculoskeletal or not.

LAB ATTIRE REQUIRED

Early bird before January 9th	\$179pp
After January 9th	\$199pp
Students	\$159pp

Course approved for 7 CEUs by AZ APTA.

Barrow
BRAIN AND SPINE

Are you practicing safely?

Is your patient not progressing?

How do you know when you need to refer out?

How do you know when it's not musculoskeletal pain?

Get the answers and learn proper screening tools to improve your outcomes with this exciting new course.
