

The Well-Being of Animals

The three philosophies of healing

Scientific	Heroic	Wisdom Way
Drugs, Chemistry, Pharmaceuticals to suppress symptoms	Herbs, Plants, Natural compounds applied to address the cause of a disorder	Nourishment to support the body systems to prevent disease & increase immunities

Start with a plan to nourish and support the body systems with as close to the ideal methods as possible. In emergencies, use the Scientific tradition to address immediate needs and allay pain. When the body needs support and balance, use the Heroic tradition to bring the balance back.

The Body Systems & their Modalities of Natural Healing

Physical	Emotional	Mental	Spirit
Herbs, Water, Nutrition, Massage, Exercise, Acupuncture, Chiropractic, Homeopathics	Flower Essences, Breathing, Homeopathics	Essential Oils in carrier oils for safety, Quiet, personal space, Homeopathics	Crystals, Stones (Earth connection), Companionship, Purpose

Important Note for Cat Owners: Many drugs and herbs that are perfectly suitable for other animals can be toxic to cats! Our personal approach is to use only Flower Essences and/or Homeopathic remedies (the energy based medicines) for ingestion by cats. Do not apply essential oils to a cat – or use any essential oil full strength on an animal.
