Financial Report

History of Our Organization

The Centre Hospitalier de Fontaine Foundation (CHFF) was founded in 2018 by Gheriane "Kareen" Ulysse as a result of her grandmother's untimely death at Fontaine Hospital (CHF) due to a lack of oxygen.

At the time of her death, the west department was experiencing a widespread lockdown. The majority of oxygen suppliers, ambulance services declined providing services in and around the commune of Cité-Soleil. By the time one ambulance service provider agreed, and arrived at Fontaine Hospital (CHF) it was already too late for her paternal grandmother.

CHF, a 24/7 hospital, was founded by Jose Ulysse in 1991 in a private effort to provide access to healthcare to the marginalized, underserved community of Fontaine, Drouillard-Duvivier Cité-Soleil. Today, the Ministry of Health and Population recognizes CHF as the only operational hospital.

According to Kareen, her grandmother's death was the result of resource accessibility she vowed to address through her foundation.

Our organization which started as a Grassroots effort to save one hospital, is now a Grassroots community intervention and development organization providing access to equitable healthcare, education, and employment opportunities in highly marginalized Haitian communities, one community at a time.

Meet Our Founder

Kareen Ulysse

C.H.F. Foundation

Founder/Executive Director

Gheriane "Kareen" Ulysse is the Haitian-American founder and executive director of the Centre Hospitalier de Fontaine Foundation (CHFF) with five (5) years of experience working in high-risk, marginalized, underdeveloped communities such as Cité-Soleil, Haiti.

She is next in line to continue and scale up her father's 32-year-old hospital, Fontaine Hospital (CHF), and job creation legacy in Cité-Soleil, Haiti. The father-daughter duo's work is featured in the Associated Press, ABC News, Le Point-Metropole, and Ayibopost, to name a few.

Kareen's wildest dream for CHFF is to :

- Build, merge, and oversee operations of at least one (1) regional hospital in each ten (10) departments in Haiti.
- Build and oversee operations of at least one college in all ten departments
- Facilitate Research at CHF
- Develop and launch revolutionary education programs to make affordable quality education accessible to all.

Vision And Mission

Vision

“Healthier Haitian communities with increased literacy and employment rates by 12% every year”.

Our core belief is that communities are reflections of the quality of healthcare, education and jobs accessible to its members. Therefore, it is our dream to build or oversee the operations of one :

- specialized regional hospital per department
- college / university and
- Pre-K to 12th grade

in all 10 departments in Haiti mirroring international standards

Mission

Our mission is to work where others don't , when others can't to save lives, bring education and create jobs one Haitian community at a time.

Focusing on one community at a time (localization) allows us to develop more relevant and effective interventions to :

1. Meet the unique needs and challenges of the marginalized communities we serve.
 - a. Tailor our programs and services to their specific cultural, linguistic, and social contexts to :
 - i. increase participation
 - ii. Reduce disparities
 - iii. Promote inclusion
2. Optimize resource allocation by focusing efforts on the most critical needs of the community.
 - a. Resources can be used more efficiently, leading to a more significant impact per dollar spent.
3. Respond more quickly and effectively to changing circumstances and emerging needs within the community.
 - a. Adaptability is crucial for addressing dynamic challenges in marginalized areas.
4. Creating job opportunities that align with the local economy and skills helps address unemployment issues.

CORE OBJECTIVES

WHAT WE DO

- We help underfunded schools and hospitals in highly marginalized and underserved communities :
 - keep their doors open
 - improve the quality of their services
 - operate closer to international standards every year
- Where no other health institutions exist we host mobile clinics,
- Where no schools exist we host educational civics and sports summer camps

WHERE WE WORK

- Fontaine, Cité-Soleil, Haiti
- Ancien Fort-Dimanche, Cité-Soleil, Haiti

LOCAL HEALTHCARE PARTNER

Centre Hospitalier de Fontaine(1991)

LOCAL EDUCATION PARTNER

- Ecole Mixte Petit Coeur de Jesus (EMPCJ) (1995)
- CFPTF College (2022)

WHY WE WORK THERE

- We've had the community's support for three decades.
- Inner cities will continue to be breeding grounds for disruptive men and women until basic human needs are met through
 - sustainable,
 - contextually relevant,
 - culturally sensitive resources.
- Nothing changes if we all avoid addressing the root causes of poverty and violence in difficult places

OUR PROGRAMS

Healthcare & Nutrition

Without proper nutrition :

- bodies cannot heal properly,
- preventative care is less effective,
- certain medications cause more harm

Our healthcare and nutrition programs provide immediate life saving resources to children, adults, and seniors in need.

Education

Schools are the next best models of what a thriving community and society can be like for at-risk youths from highly marginalized communities.

We partner with local underfunded schools to remove barriers to learning and creativity such as:

- 1.Hunger
- 2.Student and Teacher Health
- 3.Teacher turnover rates , training, and support
- 4.Classroom sizes and access to :
 - a.supplies
 - b.technology
 - c.arts.music , sports education

Child Protection & Wellbeing

Without proper support, children may struggle to:

- regulate emotions,
- form healthy relationships,
- adapt socially, potentially contributing to disruptive behavior in adulthood, negatively affecting their community and society.

Our child protection and wellbeing program provides a safe, and stable homelike environment for children from unstable, or unsafe environments.

Workforce & Economic Development

Limited access to job training and opportunities exacerbate societal issues, fostering a breeding ground for delinquency. Without avenues for skill development and meaningful employment, individuals face :

- heightened frustration
- despair
- Economic disenfranchisement

pushing them towards illicit activities as an alternative means of survival.

Our workforce development and economic revitalization program aims to end the cycles of poverty and delinquency by identifying, developing and recruiting local innovators, leaders, action takers, creators/builders/developers.

HEALTHCARE PROGRAMS

HEALING COMMUNITIES | ONE FAMILY AT A TIME

Mobile Clinics

We make affordable healthcare accessible to:

- Underserved communities
- Displaced and refugee communities
- Communities affected by natural and man-made disasters.

Nutrition

We take our local partners Child Malnutrition Recover programs to the next level by creating safe and enriching, child protection and wellbeing centers (daycares) in the hospitals and schools.

We provide access to long-term and short term child and parent developmental programs.

Pre & Postnatal Care

We help our local health partners prevent maternal and infant death by providing

- Screening,
- Monitoring,
- Treatment
- materials, supplies, equipment, and trainings needed.

Our Work

EDUCATION PROGRAMS

RESHAPING COMMUNITIES | ONE CLASSROOM AT A TIME

School Meals

"Attendance is much higher on the days we serve school lunch".

Mr. Onel François
Founder/Principal

Student Health & Wellbeing

We need programs that can help their bodies and mind heal, or at the very least cope with the daily trauma".

Mr. Onel François
Founder/Principal

Teacher Retention & Development

Commuting to work can be traumatizing. We need to support the few teachers willing to work here better.

Mr. Onel François
Founder/Principal

CHILD PROTECTION & WELLBEING

HEALING OUR NATION | ONE CHILD AT A TIME

Nutrition & Healthcare

Nutritional Recovery Program

- Short term hospital stay (0-3 months)
- Children 0-5 years old
 - Nutritional Recovery
 - Healthcare
 - Physical Therapy
 - Child Enrichment Activities
 - Parent Education

Childcare & Education

Nutritional Recovery & Child Protection:

- Short Term Hospital Stay (0-3 months)
- Transitional Housing and Childcare for internally displaced children 0-5 years old (6-24 months)
