Community Rehabilitation and
Restoration

Solution

Community Rehabilitation and Restoration

1 Partner with the primary healthcare provider.

2 Partnering with the primary Education (k-12+) provider.

3 Create opportunities for employment through our local partners

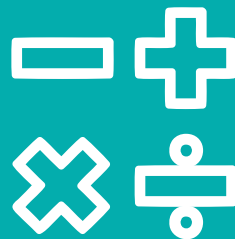

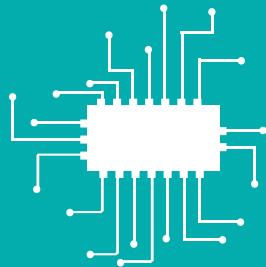

Partnering with the primary healthcare provider facilitates access to patient data that will guide program design, development, and implementation to move from treatment to preventative care.

Partnering with the primary k-12 education provider facilitates access to student data to guide S.T.E.A.M. curriculum design, development, and implementation to prepare the next generation of innovators .

We are working to design, develop, test, and launch workforce development programs for

- Medical Professionals
- Teachers
- Tradesmen ,

to work with our local partners and be of service to their own community.
