

AEGLE I

AXICON
TECHNOLOGIES

PRINCIPLE

Discover the ultimate in advanced aesthetics with Aegle I, a revolutionary device designed to enhance both body's natural healing along the body's beauty with unmatched precision and effectiveness. By integrating state-of-the-art technology, Aegle I sets a new standard in beauty and wellness.

Experience the body's natural healing process with Aesthetic Technology with Aegle I

ADVANCED TECHNOLOGY

Harness the power of RadioFrequency energy with Aegle I. This cutting-edge technology penetrates deep into tissues, inducing selective tissue hyperthermia. Scientifically proven to deliver targeted therapy, Aegle I ensures maximum efficacy and safety in every session.

Excellence in Body's Sculpting

Eliminate stubborn fat and reveal beautifully contoured shapes. Achieve a toned physique with pinpoint accuracy. Smooth out cellulite for firmer, more radiant skin.

Facial Rejuvenation

Reverse the signs of aging with rejuvenating skin treatments. Reduce wrinkles and fine lines for a youthful, vibrant glow. Enhance skin texture and brightness for a refreshed appearance.

Boost the Body's Natural Healing

Aegle I goes beyond aesthetics, offering therapeutic benefits for physiotherapy. Relieve pain, relax muscles, and reduce swelling for improved mobility. Promote tissue regeneration and accelerate healing for optimal recovery.

BENEFITS

Superior RF Power Output

Experience the benefits of enhanced RF power output, reaching up to 300W for faster energy delivery and accelerated results.

Integrated Vacuum System

Optimize your treatments with the integrated Vacuum system in Resistive Diathermy sessions. This feature enhances fat mobilization and drainage, boosting overall treatment effectiveness.

Customized Dynamic Energy Depth

Enjoy bespoke treatments tailored to your needs. Aegle I adjusts the energy penetration depth dynamically, optimizing energy flow for superior results in every session.

Smart Treatment Head Recognition

Aegle I smartly detects the treatment head in use, making precise adjustments to output waveform and energy levels. This ensures consistent, reliable, and stable energy delivery for each treatment.

Tailored Real-time Impedance

Aegle I offers unparalleled comfort through real-time monitoring of body circuit impedance. By adjusting output based on impedance levels, treatments are optimized for maximum comfort without compromising efficacy.

CET MODE

Designed for superficial tissues, the CET (Capacitive Electronic Transfer) working mode excels in precision treatments for small areas such as the face. This mode is exceptionally effective for skin tightening and anti-aging, delivering remarkable results with unmatched accuracy.

RET MODE

Perfect for thicker, fatty, and fibrotic tissues, the RET (Resistive Electronic Transfer) working mode is ideal for larger treatment areas. It penetrates deeply into tissues, targeting stubborn areas for comprehensive rejuvenation.

COMPREHENSIVE ADVANTAGES

Increasing Core Body Temperature

Elevates body temperature to 40-50°C, expanding arteries and capillaries, and increasing blood flow.

Skin Rejuvenation

Boosts collagen production, reducing wrinkles, tightening skin, and removing cellulite.

Detoxification

Helps remove toxins, alleviating pain, relaxing muscles, and reducing swelling.

Immune System Stimulation

Increases metabolism, promoting a healthy body, fat removal, and body contouring.

Embrace the future of aesthetic and wellness treatments with Aegle I, where technology meets elegance for transformative results.

SPECIFICATIONS

TREATMENT HANDLES	RET, CET, HSP
RET	R70: ϕ 70mm, R50: ϕ 50mm, R40: ϕ 40mm, R30: ϕ 30mm
CET	C70: ϕ 70mm, C50: ϕ 50mm, C40: ϕ 40mm, C30: ϕ 30mm
FREQUENCY	448KHZ
HSP	143*86mm
OUTPUT POWER	500W
VOLTAGE	220V 50HZ or 110V 60HZ
MACHINE DIMENSIONS	318*294*498mm
PACKAGE DIMENSIONS	480*385*695mm
NET WEIGHT	14.6KG
