

I NEED A MIRACLE

Pete Caputo © 2018

I'm at the corner of givin' up and expectation, this location is no place to be after
nightfall

My back is up against the wall

Well I'm outa time and outa breath, feelin' like a soldier in Macbeth...

sittin' here between sweet life and death and the house of cards' about to fall.

I'm sick and tired uh bein' sick n tired... it's time for this head to be rewired,

Done everything a man can think to do, now i'm gonna trust in you...

I need a miracle....

I had enough of human reliance, cause they only trust in science,

They say trust in what you see, not what you know... goes to show... gotta say
no

To the pop culture scene, and the group think machine

Can a brother have another chance ta take it down turn it all around

Till I'm heaven bound... to hear the sound...

from deep inside, let it ride, no longer can it be denied, I called you and you
heard my cry.

and your Love delivered me... it's a

Miracle.....

Wait.... on... me....

So you want to talk to me... I'll listening for you

Trust.... in.... me.....

What I heard, it's in your word, I know what to do now.

Wait... on me....

When push comes to shove, ain't nothing like your perfect love

makes the blind to see, you delivered me, it's a bona fide anomaly

it's a clear cut manifestation, everybody rise up, time to rock the nation, let's
make it now our proclamation, that Love's a miracle...

your love's a miracle, miracle, miracle yeah.
