### 106 COMING STATE PERMIT APPLICATION

Submit comments online by Monday, August 25!

<https://tinyurl.com/mvxsu45b>

As part of this project, the College of Charleston is currently seeking a Coastal Zone Consistency permit from the state Department of Environmental Services that will enable it to proceed with **demolition, archaeological excavation, and initial piledriving**. Moving ahead with any of this work without detailed plans for the demolition, excavation, and relocation of any burials poses a significant risk to this historic site and the irreplaceable cultural resources it contains.

Through the Bureau of Coastal Management's Coastal Zone Consistency (CZC) Certification program, the public has the opportunity to engage.

**If 20 people request a public hearing, the community will have the opportunity to weigh in!**

Submit your comments and request a public hearing

**before the August 25** deadline!
