

Scott Barracks renovation and modernization, West Point, New York

### People. Partnerships. Possibilities.

collaborating to plan communities and installations that are ready for the future

envisioning ways to provide infrastructure security, disaster resilience, and climate adaptation solutions

helping clients do more with less using risk-based and predictive analytics

enhancing infrastructure performance and operational readiness

We have supported federal clients around the nation for more than 55 years.

# THE ROAD TO RESILIENCE Rising to the challenge with resilient and sustainable solutions that meet mission objectives.

## Innovation. Inspiration. Transformation.

solving complex challenges

creating resilience through innovative technologies

evolving to address changing political, social, and economic demands

enabling capacity for the future

#### Together, we'll strategize to optimize.

Master planning and program management, Fort Belvoir, Virginia

#### Reuse. Repurpose. Renew.

reducing water and energy use increasing operational cost savings protecting wildlife and natural resources repurposing existing facilities into efficient, sustainable infrastructure that's good for the environment, too
