

Stile & Rail Panel Doors

Stiles and Rails are the vertical and horizontal wood pieces that create the frame of a panel door. With raised and flat panels in multiple species and materials, our stile and rail panel doors allow us to craft any style of door, while ensuring a high level of craftsmanship and quality.

- ◇ **Stile** - Vertical portions of a door that, when combined with rails, hold up the door panels and make up the outer edge of the door.
- ◇ **Rail** - Horizontal pieces of the door that join with the stile components to provide strength and hold the panels in place.
- ◇ **Panel** - Available with a Raised or Flat Profile, Panels rest within the stile and rail frame, allowing the door components the room needed to shift as the wood naturally expands and contracts. All pieces are bonded with adhesive.

Raised Panel

Standard Panel Door

Solid Wooden Panel Door

Primed MDF Pressed Panel Door

Flat Panel

Standard Flat Panel Door

White Shaker Door

Solid Timber Panel Door
