AL 30 INTERNAL MIX

INDUSTRIAL SPRAY NOZZLES
AIR ATOMISING - BROCHURE

AIR ATOMISING - AL 30 IM

SPRAY CHARACTERISTICS

- The AL 30 series produces a wide, round spray pattern with a nominal angle of 70°.
- This is an internal mix nozzle, where a change in air or liquid pressure will result in a change of flow or atomization.
- Increasing air pressure decreases flow and increases atomization.
- Increasing liquid pressure increases flow and decreases atomization.
