

AL 75 INTERNAL MIX

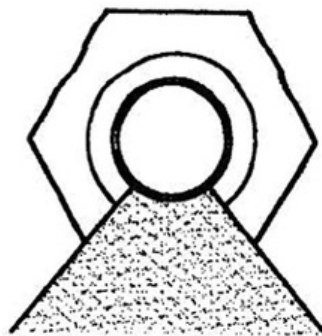

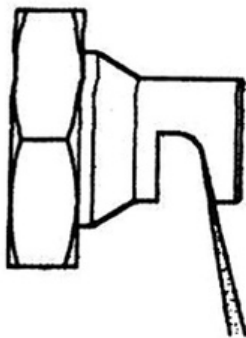

INDUSTRIAL SPRAY NOZZLES
AIR ATOMISING - BROCHURE

AIR ATOMISING - AL 75 IM

SPRAY CHARACTERISTICS

- The AL 75 series offers a right angle version of the flat spray.
- Spray pattern is thinner than that of the standard straight versions and can be directed into a more concentrated pattern.
- This is an internal mix nozzle, where a change in air or liquid pressure will result in a change of flow or atomization.
- Increasing air pressure decreases flow and increases atomization.
- Increasing liquid pressure increases flow and decreases atomization.
