

TURNAFLEX NOZZLE KIT

INDUSTRIAL SPRAY NOZZLES
AIRLESS - BROCHURE

TURNAFLEX NOZZLE KIT

FEATURES

- The Turnaflex Nozzle kit utilizes the same Carbide insert as the Airless Tip but with a Brass housing to fit a Turnaflex adaptor.
- The Brass housing is bonded to the Carbide insert and is slotted in the orifice area. The slot is also utilised for orientation purposes by using a special alignment tool.
- Each Turnaflex Nozzle Kit is supplied with grubscrews, for both Turnaflex and competitive units, and an alignment tool.
- The Turnaflex number is stamped on the Brass housing for ease of identification e.g. L5.
- The Turnaflex Nozzle is flow tested and pattern width checked in the same way as the Airless Tip.

TURNAFLEX NOZZLE KIT CONTENTS
