

FERTIACO INVESTMENT LTD

ENGINEERING TO PROTECTIVE FINISH

ENGINEERED. FABRICATED. PROTECTED.

One coordinated route from structural analysis and connection design to procurement, fabrication, blasting, painting and fire protection.

SEND YOUR DRAWINGS, BOQ OR DESIGN BRIEF

International project support from enquiry through delivery.

COMPLETE STEEL FABRICATION

END-TO-END DELIVERY

ONE TEAM. SEVEN CONTROLLED STAGES.

Technical coordination | Quality focus | Project delivery

01

STRUCTURAL ANALYSIS + DESIGN

Design assessment aligned with project loads, geometry and performance requirements.

02

CONNECTION CALCULATIONS

Engineered connection checks and calculation packages for coordinated execution.

03

FABRICATION DRAWINGS

Clear shop drawings, details and schedules prepared for controlled production.

04

MATERIAL PROCUREMENT

Project-specific steel sourcing with technical and commercial coordination.

05

STEEL FABRICATION

Cutting, forming, fitting and welding coordinated to approved fabrication documentation.

06

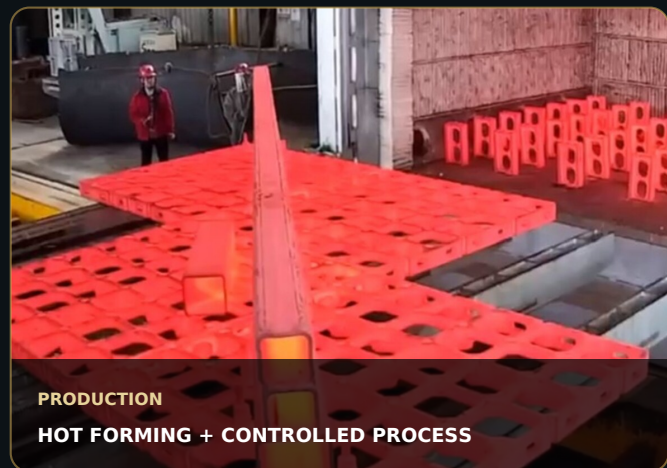

SHOT BLASTING + PAINT

Surface preparation and protective coating systems for the specified environment.

07

FIREPROOF PAINT

Passive fire-protection coating applied to the required project specification.

PRODUCTION
HOT FORMING + CONTROLLED PROCESS

FABRICATION
PRECISION FORMING + WORKSHOP SUPPORT

CAPABILITY
LARGE-DIAMETER STEEL FORMING
