

Disease Prevention From Semaglutide & Tirzepatide

Semaglutide & Tirzepatide may **directly** help prevent & fight the most-deadly & debilitating diseases. However, these disease fighting effects mostly stop helping when you stop taking the medicines.

MedPure wishes to: (1) Educate you on these disease-preventing effects; (2) Encourage you to ask about your disease concerns with us and other medical professionals; and (3) Point to research & resources on these effects with similar medicines. Please remember that we do not replace your physicians' & medical providers' testing, advice, treatments, and prescriptions (other than weight-loss) to diagnose and treat any of these conditions.

To help remember these positive effects, imagine you have a free *get-out-of-jail card* called **HIS COPP CARD**. Now check each disease-prevention effect that is important to you. Then click-on and read the resources.
