Tirzepatide PLUS B12 & Glycine Maintenance Dosing

of syringes

≈ MG per syringe

Who uses PLUS Maintenance

Weeks #

- 1. Members who have already achieved their weight-loss goals and want to keep it off at a low-cost.
- 2. Members who wish to keep the many medical benefits of Tirzepatide, B12, & Glycine.
- 3. Members with low weight-loss goals who wish to have a little more weight-loss at lower-cost.

Note: To be on Maintenance, Members must take at least 4-months of any MedPure Memberships.

Instructions. Fill each syringe to the unit line below. Note: 1ml = 100 units.

Members are initially shipped 2-months worth of Tirzepatide PLUS for the following doses.

≈ Units per syringe

1-8	8 syringes	25 units	2.5mg
Remember: Months are 4-weeks. Bi-Monthly is 2-months or 8-weeks.			
If you need extra syringes, order 1ml Insulin Syringes, 5/16" (8mm), 31G (.25mm) HERE.			
Use MedPure's Dosing Calendar to write-down the units above on your inject-days.			
Your shipment contains 2-Months (8 weeks) of Tirzepatide PLUS in vials and empty syringes.			
Check all foil & paper wrapping for your vials and empty syringes.			
To fill syringes, use <u>How to Fill Weight-Loss Syringes</u> and watch this <u>video</u> .			
Refrigerate your vials & filled-syringes & vial(s) in a sealed plastic bag or a hard travel-case.			
Immediately, or on your next inject-day, self-inject Week #1's syringe.			
Use How to Self-Inject and watch this video.			
Then, every 7-days (weekly), on your "inject-day," self-inject your next correctly-dosed syringe.			
Properly discard any unused medication after 90 days. Do not reuse syringes.			
Do not flush medications or pour down a drain.			
Use a Sharps Container or a Bottle with Cap to dispose of used syringes.			
Keep all medicines out of the reach of children.			
Do not share or take anyone else's medicine.			
Go to MedPure.com for side-effects, cautions, and <u>Terms & Conditions</u> .			
If you would like to request a consultation, call your Primary Consultant or (470) 474-1000.			

Side-effects may include nausea, acid reflux, diarrhea, constipation, and vomiting but usually decrease over time. See <u>MedPure.com</u> for a more complete list and how to reduce them. Seek medical attention if severe abdominal pain or allergic reaction. Rodent studies have shown risk of Thyroid C-Cell Tumors (but not in human-studies). Avoid if personal or family history of MTC or MEN 2).
