RISE IN MULTI-UNIT LIVING

As the number of residents in multi-unit housing climbs to a record number, property managers, building owners and HOAs will see an increasingly competitive market. EV charging has become a must-have amenity to attract and retain residents. As more drivers "go electric", it is important to meet consumer demands and expectations.

Eniac Inc. brings building managers and residents turnkey EV charging solutions that are customer-centric, economical, and easy to manage.

BENEFITS OF EV CHARGING:

- Support Resident Demand
- Attract New Residents
- Increase property value
- Meet Building compliance

ENIAC ENERGY CUSTOMER QUOTE

"I loved the simplicity of Eniac Energy's power sharing ability that allows us to add more charging stations per building than we otherwise have been able to add." - BUILDING OWNER

Solutions

We CAN RETROFIT YOUR BUILDING

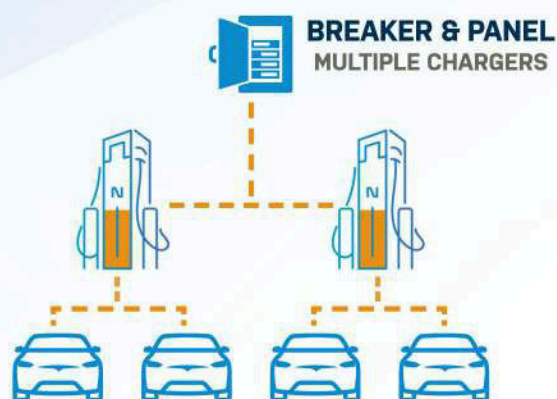

Most buildings do not have electric capacity to add EV charging. Our smart chargers allow you to add more chargers per piece of infrastructure. This allows for more residents to plug in and charge.

In turn, your building avoids expensive electrical service and helps minimize the costs of new electrical infrastructure. Our fully integrated software and hardware make onboarding simple for any building management team and customize the chargers behavior to their preferences.

We also have financing programs that include 100% of your installation and infrastructure costs.

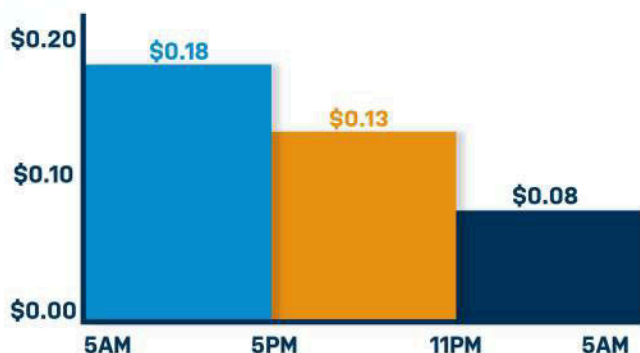

POWER SHARING:

Maximize the amount of plugs at a location. Don't let the existing electrical constraints prohibit charging.

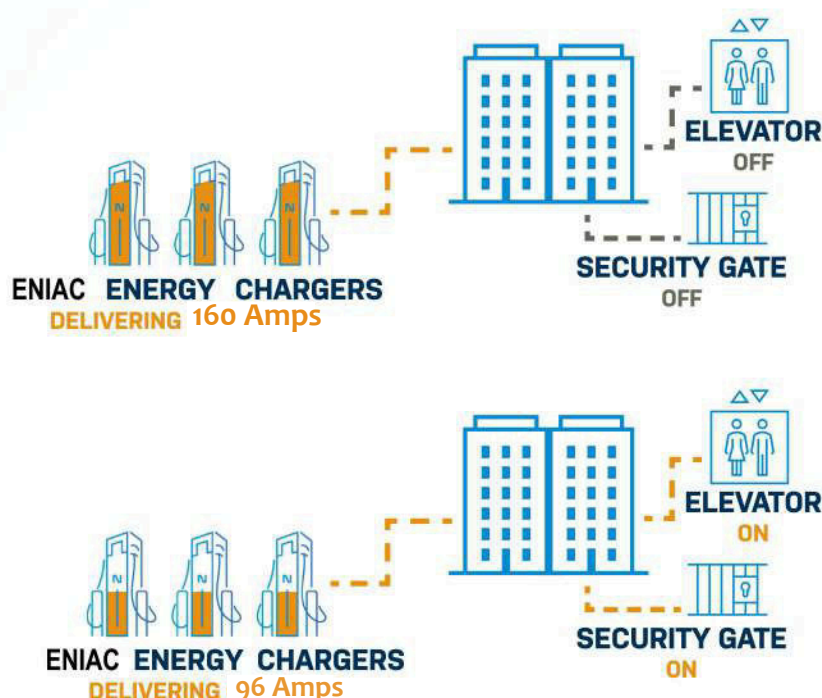

FLEXIBLE RATES & DRIVER FEES

Customize rates and the time of day/year charging to align with your utility's least cost rate structure.

DYNAMIC CHARGING:

Dynamic charging allows you to share your current electrical infrastructure with ENIAC Energy chargers and your building's higher priority equipment.

ABOUT ENIAC ENERGY

ENIAC Energy offers an extensive line of EV car chargers backed by the most intelligent, fully-integrated software in the industry. Our "Buy America" compliant hardware is ruggedized and tested in the harshest environments while our software provides the ability for power management, driver grouping and more. All products include the industry's best warranty, support and software package.
