HOW TO TAKE A SOIL SAMPLE

1. To take the sample, use a sampling tube, spade, trowel or long knife. Sample 6-8 inches deep for gardens shrubs or trees and 3-4 inches for turf. Discard any surface residue, thatch or stones.

2. Sample different areas of the turf, garden or landscape separately. From each distinct area take several cores or slices.

3. Combine the cores or slices in a bucket and mix well. Transfer one (1) cup of the mixed sample to a soil sample or plastic bag.

4. bring your soil sample to us and we will ship it our for you and contact you with the results via phone or email.
