HOW TO TAKE A SOIL SAMPLE

<p>1.</p> <p>To take the sample, use a sampling tube, spade, trowel or long knife. Sample 6-8 inches deep for gardens shrubs or trees and 3-4 inches for turf. Discard any surface residue, thatch or stones.</p>	<p>2.</p> <p>Sample different areas of the turf, garden or landscape separately. From each distinct area take several cores or slices.</p>	<p>3.</p> <p>Combine the cores or slices in a bucket and mix well. Transfer one (2) cup of the mixed sample to a soil sample or plastic bag. Label the bag with your name and sample number.</p>	<p>Bring your sample and this form to our office and we will get it sent out for you.</p>
