# Tree Descriptions

## SEEDLINGS & TRANSPLANTS

### Arborvitae

Fast-growing and easy-to-care-for. Valued for the year-round visual interest they bring to a landscape. Highly prized as a hedge or screen plant.

### Balsam Fir

Soft, waxy and aromatic. Likes sun and cool moist well drained soils, paper and lumber, a favorite Christmas tree. Transplants only

Michigan Native

### Black Spruce

Also called swamp spruce, moist. Prefers cool sites. Used by wildlife for shelter and small animal food.

Michigan Native

### Blue Spruce

Slow to moderate grower in fertile loams and clays. Used for windbreaks, wildlife and Christmas trees. Blue color varies with nurseries.

### Douglas Fir

Grows well on most upland soils except those with high lime content in top soil. Prefers cool climates.

Native to North America

### Norway Spruce

Fast grower, does well on well to poorly drained soils, clay and loamy sands. Identified by its drooping branches and large cones. Use for windbreaks, timber, pulpwood and wildlife resources.

### Pawpaw

Easily grown in average, medium to wet, well-drained soil in full sun to part shade. Prefers moist, acidic, fertile soils. Will grow in shade but becomes leggy.

Michigan Native

### Red Cedar

Dense, somewhat prickly blue-green foliage that turns deep purple by late fall. Grows on most soil types except swamp. 30-100' in height

Michigan Native

### Red Pine

Moderate to fast grower, prefers well drained soils. Used for windbreaks, timber, pulpwood and wildlife. Much better choice than Austrian Pine.

Michigan Native

### White Cedar

Prefers cold, wet sites with slow drainage, but not stagnant water, wider variety of wood uses. The most important winter food of Michigan's whitetail deer herd.

Michigan Native

### White Pine

Slow grower at first but once established grows faster, moist sandy loam, but will grow from swamps and sand, timber, windbreaks, pulpwood and wildlife.

*Michigan's State Tree!*

### White Spruce

Slow to moderate grower in fertile loams and clays, faster when established. Lumber, pulpwood, Christmas trees, wildlife. Deer are not overly fond of these.

Michigan Native

## Arenac Conservation District

always recommends Michigan Native trees and shrubs for the best survivability and diverse species to ensure a healthy stand.

## DECIDUOUS

### Black Cherry

Grows best in deep, moist soil but, will grow in sandy soils. Wood is hard and strong, useful in furniture making. Cherries are sweet and an important food source wildlife.

Michigan Native

### Black Walnut

Thrives in well-drained, moist soils and prefers full sun. It does not perform well in shaded areas. **Roots release a toxin that harms surrounding trees. Don't plant near birch.**

Michigan Native

### Chinese Chestnut

Blight resistant with sweet-tasting nuts often roasted for holiday eating, it is also a great tree for wildlife.

### Hazelnut

Also known as Filbert. Prefers deep fertile well drained soils, does not tolerate wet feet. Will produce a crop in 3 to 4 years. Excellent turkey food source.

Michigan Native

### Mountain Ash

Grows best in rich moist soils. A short tree with a showy floral display in late spring and early summer and bright orange berries in the fall. A great winter food source for birds. This is not a true ash and is not affected by Emerald Ash Borer.

Michigan Native

### Redbud

A spectacular landscape tree with magenta pink flowers that is easily grown in well-drained soils and partial shade. An ideal showy spring feature.

Michigan Native

### Red Maple

Fast grower in a variety of soils, nice shade tree with beautiful red fall foliage.

Michigan Native

### Red Mulberry

Juicy, purple-black berries produce mouth watering jelly and deep purple wine. Hardy 25-40 ft. tree is fast growing and fine for shade. Ripens in July.

Michigan Native

### Red Oak

Moderately fast growing in well drained, rich, moist loam soils, transplants easily, lumber and wildlife.

Michigan Native

### Silver Maple

Rapid grower in well drained moist soils, graceful foliage. Useful for lumber, birds, small mammal food sources.

Michigan Native

### Swamp White Oak

A striking tree whose lustrous leaves have a two-tone appearance, dark green on top with a silvery-white underside. Fall color is an orange-gold to yellow in mid-autumn. An excellent shade tree for any landscape.

Michigan Native

### Sugar Maple

Best in fertile, slightly acidic, moist soils in full sun. Grows poorly in compacted, poorly drained soils. Intolerant of road salt. Generally intolerant of urban pollution.

Michigan Native

### White Birch

Rapid grower in well drained sand, loam, used for reforestation, in yards and by wildlife.

Michigan Native

### White Oak

Slow grower in all but the wettest soils, food source for grouse, small mammals & whitetail.

Michigan Native

## SHRUBS

### Buttonbush

Michigan Native

These small-growing shrubs grow best in wet soil and swampy areas. Their tiny button-like flowers attract hummingbirds and butterflies.

### Dogwood, Flowering

Michigan Native

Dry to moist soils, beautiful white spring flowers, red fruit, birds and small mammals

### Dogwood, Red Osier

Michigan Native

Prefers moist soils, especially along streams, useful for erosion control, white flowers, small white fruit, red branches in winter, good food for white-tail deer.

### Dogwood, Silky

Michigan Native

Moist soils, white flowers, blue fruit, useful for erosion control, birds and small mammals.

### Elderberry.

Michigan Native

Rich moist soil in sunny location, white flowers, purplish-black fruit. Use for wildlife and wine making.

### High Bush Cranberry

Michigan Native

Tolerates poor soils, prefers cool, moist site, small white to pink flowers, fruit is translucent red berry. Species good for wildlife.

### Lilac

Purple colored fragrant flowers bloom best in full sun and moist soil.

### Nannyberry

Michigan Native

Moist to well-drained soils, white flowers, blue-black fall fruit, called wild raisin, birds and other wildlife.

### Serviceberry

Michigan Native

Well drained variety of soils, edible blue-black fruit, eaten by birds. Also known as **Juneberry**.

### Winterberry

Michigan Native

Found in moist soils and occasionally drier soils, easy to grow, small white flowers, but look out when it comes to fall its slender branches are covered with small red berries that remain into winter giving color to the landscape, wildlife. Also known as **Michigan Holly**

### Witch Hazel

Michigan Native

Bright yellow cluster blooms produce a woody brown nut capsule that when mature, explodes with a snapping pop, medicinal uses and whitetail.

#### **Join our Earth Team Volunteers !**

Arenac Conservation District is looking for volunteers to help sort and pack the tree orders prior to pick up.

If you would like to help please contact us at 989.846.4565 ext. 5 or dawn.hergott@mi.nacdn.net

Thank You!

## GARDEN PLANTS

### Asparagus, Jersey Giant

A male hybrid garden plant. Its energy goes into producing spears rather than seeds as with female plants. A very productive plant: yields 2-4 times more spears than older varieties. It is also disease resistant, which is a bonus.

### Blueberry: Bluecrop/Earliblue

one of each plant

A great blueberry plant for colder climates. Produces big clusters of large, all-purpose berries Cold-hardy. Ripens in July. Earliblue are sweet and firm.

### Grapes, Concord

Vigorous and hardy, ideal for jelly and juice.

### Grapes, Niagara

Popular white grape, excellent flavor, table use and wines.

### Raspberries, Heritage

Harvest starts in early fall and will last until extremely cold weather.

### Strawberries, Seascape

A day neutral type of strawberry variety. It is noteworthy for high flavor, high yield, large fruit size, firmness, symmetry, attractive appearance and flexibility in planting requirements.

### Achillea 'Firefly Red Pop'

These yarrow plants are an excellent balance of finely textured foliage and bright flowers. The wide, flat flower clusters are popular landing pads with pollinators.

### Asclepias—Butterfly Weed

A virtually hassle-free, very long lived perennial, offering three months of tangerine orange blooms from early through late summer. Very attractive to butterflies, bees and hummingbirds.

### Echinops "Blue Glow"

A clumping perennial that is very easy to grow but not invasive. Beginning in early summer, intense blue spheres measuring 1.5" across appear on tall, unbranched stems. Bumblebees and noctur-

### Hibiscus Root

Commonly known as hardy hibiscus or swamp rose mallow, is a vigorous, sturdy, rounded, somewhat shrubby, hairy-stemmed, woody-based perennial of the mallow family. It typically grows to 3-7' tall and to 2-4' wide and is native to wet spots.

### Leucanthemum "Whoops-a-Daisy"

'Whoops-a-Daisy' forms an exceptionally dense, rounded ball-shaped mound of dark green foliage that becomes completely blanketed in large 3-4", white flowers with gold centers from early through midsummer. Try growing this cute perennial in containers or in the landscape where it will shine brightly near the border.

### Liatris bulbs:

Also known as blazing star or gay feather perennial. Plant bulbs three to four inches apart and five inches deep. Flowers in July and August with purple or white flower spikes.

### Monarda "Cherry Pops" Bee Balm

Part of the Sugar Buzz series. In midsummer, 'Cherry Pops' forms a solid dome of cherry red, 2-2½" flowers on strong, well-branched stems. The dark green foliage forms an upright clump that will fill out containers nicely but won't run all over the garden.

# Fruit Tree Descriptions

**Fuji Apple:** The deep pinkish-red hue delivers in even difficult-to-color areas. The fruit maintains the sweet flavor and crisp crunch expected from the Fuji variety. **EMLA 7**

**Cortland Apple:** Its flavor is sweet compared to McIntosh, and it has a flush of crimson against a pale yellow background sprinkled with short, dark red stripes and gray-green dots. **EMLA 7**

**Gibson Golden Delicious Apple:** A russet-resistant form of the original. Fruit is firm, medium to large with the classic Golden Delicious flavor. The tree is spreading, productive and easy to manage. Fruit thinning is required to maintain annual bearing. **EMLA 7**

**Granny Smith Apple:** Consumers like it for its tart, crisp and juicy flavor and outstanding keeping qualities. Is used for both fresh packs and processing and produces large, round fruit. The tree is vigorous and sets crops early. Ripens in November. **EMLA 7**

**Honey Crisp Apple:** Sweet as honey. Crisp, cream-colored flesh is mild, sweet and aromatic, ripens in early September. **EMLA 7**

**Manchurian Crab Apple:** A flowering crabapple used to pollinate other apple varieties. The white flower is a very prolific pollen producer. Blooms early and through midseason. Fruit is too small for commercial purposes. **EMLA 7**

**Nova Spy Apple:** Fruit has a sweet, pleasant flavor, making it very good for fresh eating. It bakes and keeps well. This variety has shown good resistance to apple scab. **EMLA 7**

**Red McIntosh Apple:** The fruit colors early with a deep red hue. A hardy and productive tree, it is sometimes used as a hardy understock for other apple varieties.. Ripens Late September. **EMLA 7**

**Scarlett Spur II Red Delicious Apple:** Although Scarlett Spur II finishes coloring about three days earlier than its parent, it has all the winning characteristics of the original – dark mahogany color, crisp white flesh, excellent fruit production, and outstanding type. **EMLA 111**

**Wolf River Apple:** Wolf River is an antique variety best known for its large size. It is an early-season apple, excellent for cooking and baking. The finish is a very pale red blush on yellow background. Wolf River is considered somewhat scab resistant and is a very winter hardy tree. **EMLA 7**

**Balaton Cherry:** renowned for its versatility and luscious fruit, reminiscent of the Montmorency but larger and firmer in texture. This tree offers an extended cherry-picking season, bright red cherries for a longer harvest. Self pollinating. **MAZZARD**

**Jubileum Cherry:** An early season sweet-tart cherry. Large dark-red cherries have a tangy flavor. Good for eating fresh and making juice. Self-pollinating. **MAZZARD.**

**Lapins Cherry:** Self-pollinating and tolerates late frost! Has a purple-red flesh that is sweet, firm and almost meaty. Exquisite fresh eating, right off the tree. Good overall disease and crack resistance. Ripens in July. Self pollinating **MAZZARD**

**Rainier Cherry:** Large, yellow fruit with a half-red blush; birds are less attracted, due to the yellow half. Very firm, sweet flesh has a fine texture and distinct, outstanding flavor. Bud-hardy and crack resistant, making it the cherry of choice for backyard gardeners. Self pollinating **MAZZARD**

**D'Anjou Pear:** Fruit firm, juicy and with rich flavor. Best flavor when stored for one or two months. Ripens in August. Self pollinating **OHXF 87**

**Bartlett Pear:** The leading commercial pear for both canning and fresh fruit sale. This large fruit has a smooth and attractive appearance. Its flesh is tender and juicy, buttery and of high dessert quality. Tree has a tendency for compact, upright growth which lends itself to dense plantings. Also excellent for home use. Self pollinating, Ripens in August. **OHXF 87**

**Clapp's Favorite Pear:** The fruit is large, pale lemon-yellow, with a flavor similar to that of Bartlett. It should be allowed to finish ripening off the tree for best flavor and consistency.

**Loring Peach:** A large, firm, yellow-fleshed freestone with attractive red color over a yellow ground color. Loring has been an important commercial peach variety for many years and is considered one of the best canning and freezing varieties. The trees are vigorous, productive and resistant to bacterial spot. Self pollinating **SEED**

**Red Haven Peach:** Tree is vigorous, very bud-hardy and productive. Fruit is medium-sized and colors to a brilliant red. One of the best commercial varieties. Ripens around August. Self pollinating **SEED**

**Summer Beaut Nectarine:** An exceptional yellow-fleshed nectarine maturing a few days after Redhaven. This freestone has a medium size, good color and firmness for an early-season nectarine and is recommended to precede Sunglo. **SEED**

**Stanley Prune:** The gold standard for prunes. This variety produces abundant crops of oval-shaped fruit with deep purple skin and sweet golden flesh. Tastes great when picked fresh or when dried or canned. Self pollinating **SEED**
