Tree Descriptions

SEEDLINGS & TRANSPLANTS

Arborvitae (*Thuja*) -Their popularity as landscape plants is due to their fast-growing, easy-to-care-for nature, and the year-round visual interest they bring to a landscape. arborvitae is 'Emerald

Black Spruce

Also called swamp spruce, moist, cool sites, used by wildlife for shelter and small animal food. **Michigan Native**

Blue Spruce

Slow to moderate grower in fertile loams and clays, windbreaks, wildlife and a very popular Christmas tree, blue color varies with nurseries.

Douglas Fir

Grows well on most upland soils except those with high lime content in top soil.

Hemlock

One of the more shade-tolerant evergreens, it can be sheared as a hedge, or planted for screening. Native to the eastern U.S. resembles Christmas trees. **Michigan Native**

Norway Spruce

Fast grower, does well on well to poorly drained soils, clay and loamy sands, identified by its drooping branches and large cones. windbreaks, timber, pulpwood and wildlife.

Red Cedar

Dense, somewhat prickly blue-green foliage that turns deep purple by late fall. Grows on most soil types except swamp. 30-100' in height. **Michigan Native**

Red Pine

Moderate to fast grower, prefers well drained soil, sand, loam, gravel. Windbreaks, timber, pulpwood and wildlife. Much better choice than Austrian Pine. **Michigan Native**

White Cedar

Prefers cold, wet sites with slow drainage, but not stagnant water, wider variety of wood uses. The most important winter food of Michigan's whitetail deer herd. **Michigan Native**

White Pine *Our State Tree!* Slow grower at first but once established grows faster, moist sandy loam, but will grow from swamps and sand, timber, windbreaks, pulpwood and wildlife. **Michigan Native**

White Spruce

Slow to moderate grower in fertile loams and clays, faster when established. Lumber, pulpwood, Christmas trees, wildlife. Deer are not overly fond of these. **Michigan Native**

DECIDUOUS

Black Cherry

Grows best in deep, moist soil but, will grow in sandy soils. Wood is hard and strong, useful in furniture making, cherries are sweet and an important food source wildlife, deer mice, chipmunks and squirrels like to eat the pits and store for winter use. **Michigan Native**

Black Walnut

Moderately fast growth in moist sandy loam and silt, intolerant of shade likes open space, not a lawn tree and needs to be planted a distance away from other trees. Nuts are edible for wildlife. The most valuable hardwood in Michigan. **Michigan Native**

Chinese Chestnut- the blight-resistant Chinese chestnut is quick gaining popularity. The sweet-tasting nuts are often roasted for holiday eating. Great for deer.

Hazelnut- Also known as Filbert, deep fertile well drained soils, do not tolerate wet feet, will produce a crop in 3 to 4 years, excellent turkey food source. **Michigan Native**

Mountain Ash-Grows best in rich moist soils, reach only about 15 -25 feet in height with slender trunks, put on a showy floral display in late spring and early summer, flash their bright orange berries in the fall, bird food source, this is not a true ash and is not affected by Emerald Ash Borer. **Michigan Native**

Red Bud-A landscape tree with magenta pink flowers causes heads to turn and smiles to form, a favorite of horticulturists because of its ease of planting, rapid growth, pleasing form and ability to flower when only four to five years old. **Michigan Native**

Red Maple

Fast grower in a variety of soils, nice shade tree with beautiful red fall foliage. **Michigan Native**

Red Mulberry- Juicy, purple flowers cause heads to turn and smiles to form, a favorite of horticulturists because of its ease of planting, rapid growth, pleasing form and ability to flower when only four to five years old **Michigan Native**

Red Oak

Moderately fast growing in well drained, rich, moist loam soils, transplants easily, lumber and wildlife. **Michigan Native**

Silver Maple-Rapid grower in well drained moist soils, graceful foliage, used for lumber, birds, small mammal food source. **Michigan Native**

Sugar Maple-Slow grower in moist to poorly drained fertile soils, hardwood lumber and pulpwood, used for maple sugar. **Michigan Native**

Swamp White Oak-Swamp white oak is a striking tree. The lustrous leaves have a two-tone appearance, dark green on top with a silvery-white underside. Fall color is an orange-gold to yellow in mid-autumn. An excellent shade tree for any landscape. **Michigan Native**

White Birch-Rapid grower in well drained sand, loam, used for reforestation, in yards and by wildlife. **Michigan Native**

White Oak-Slow grower in all but the wettest soils, food source for grouse, small mammals & whitetail. **Michigan Native**

Arenac Conservation District always recommends Michigan Native trees and shrubs for best survivability and diverse species to ensure a healthy stand.

SHRUBS

Butterfly Bush

Full sun to partial shade, slender arching branches, with stalks of fragrant color in lavender, white or magenta, mid-summer to frost.

Choke Cherry-A large, deciduous shrub or small understory tree, choke cherry grows 20-30 ft. tall and often forms thickets. Dense clusters of white flowers are followed by red fruit ripening to dark purple from August to September. They can be made into preserves and jelly. Wildlife, habitat, watershed protection.

Dogwood, Flowering

Dry to moist soils, beautiful white spring flowers, red fruit, birds and small mammals. **Michigan Native**

Dogwood, Red Osier

Prefers moist soils, especially along streams, useful for erosion control, white flowers, small white fruit, red branches in winter. Whitetail **Michigan Native**

Dogwood, Silky

Moist soils, white flowers, blue fruit, useful for erosion control, birds and small mammals. **Michigan Native**

Elderberry

Rich moist soil in sunny location, white flowers, purplish-black fruit, Wildlife and wine making. **Michigan Native**

High Bush Cranberry

Tolerates poor soils, prefers cool, moist site, small white to pink flowers, fruit is translucent red berry. Species good for wildlife. **Michigan Native**

Lilac- Common Lilac is a purple colored fragrant flowers in May.

Nannyberry

Moist to well-drained soils, white flowers, blue-black fall fruit, called wild raisin, birds and other wildlife. **Michigan Native**

Ninebark

Moist soil, large clusters of white flowers, red fruit, wildlife. **Michigan Native**

Rose of Sharon

Full sun to light shade, very showy large flowers.

Serviceberry

Well drained variety of soils, edible blue-black fruit, eaten by birds. **Aka Juneberry Michigan Native**

Winterberry

Also known as **Michigan Holly**, found in moist soils and occasionally drier soils, easy to grow, small white flowers, but look out when it comes to fall its slender branches are covered with small red berries that remain into winter giving color to the landscape, wildlife. **Michigan Native**

Witch Hazel

GARDEN PLANTS

Asparagus-Mary Washington-Heritage. Open pollinated variety. Medium to large purplish-tinged, tightly-budded spears. Grows well, one of the older, tried and true Varieties.

Blueberry-Blue Crop/Blue Ray -one of each plant.

Early to Mid Season crop. It has a long harvest period. This fruit is large with good flavor. Excellent color and a firm fruit. Blueberries need a well-drained soil, with a pH balance between 4.5 and 5.5.

Grapes, Concord

Vigorous and hardy, ideal for jelly and juice.

Grapes, Niagara

Popular white grape, excellent flavor, table use and wines.

Tips: Plant in early spring. place plants 2 ft. apart. Make sure the top roots 2" to 3" below ground line. Pack soil firmly around plant and water immediately plants can reach a height of 3-4'

Raspberries-Heritage.

Harvest starts in early fall and will last until extremely cold weather.

Soil tips: Raspberries prefer a soil pH of 5.6 to 6.2; if your soil is acidic, you can use ground limestone to increase the ph. Before planting , fertilize with 10-10-10 garden fertilizer or compost.

Strawberries- Seascape-A day neutral type of strawberry variety.

It is noteworthy for high flavor, high yield, large fruit size, firmness, symmetry, attractive appearance and flexibility in planting requirements

Flower Descriptions

Hibiscus Root- *Hibiscus moscheutos*, commonly known as hardy hibiscus or swamp rose mallow, is a vigorous, sturdy, rounded, somewhat shrubby, hairy-stemmed, woody-based perennial of the mallow family. It typically grows to 3-7' tall and to 2-4' wide. It is native to wet spots

Fountain Grass (*Pennisetum alopecuroides*) Mound forming plant that grows well in fertile, moist, wet or well drained soil. It prefers full sun to very light shade. Great with other perennials as a specimen plant. Mass planting produces a colorful display when in bloom. Flowers like soft cattails up to 3' tall in July through early winter. Flower color changes from whitish purple to coppery purple.

Liatris - bulbs-Also known as blazing star or gay feather perennial. Plant bulbs three to four inches apart and five inches deep. Flowers in July / August with purple or white spikes. Hardy in zones 3-4 with mulch, 5-9 without mulch. Attracts butterflies.

Arenac Conservation District always recommends Michigan Native trees and shrubs for best survivability and diverse species to ensure a healthy stand.

Fruit Tree Descriptions

Early Anvil Fuji: Anvil to revolutionize the Fuji market, this sensational strain matures about six weeks ahead of standard Red Fuji sports yet produces a higher percentage of fruit. The fruit flavor, tree structure, and growth habit appear to be identical to other Red Fuji strains. EMLA 7 root stock

Cortland: Its flavor is sweet compared to McIntosh, and it has a flush of crimson against a pale yellow background sprinkled with short, dark red stripes and gray-green dots. EMLA 111 RS

Granny Smith- This green apple import from Australia has become an American standard. Consumers like it for its tart, crisp and juicy flavor and outstanding keeping qualities. Is used for both fresh packs and processing and produces large, round fruit. The tree is vigorous and sets crops early. Ripens in November. EMLA 106 rootstock, semi dwarf 15-20'

Honey Crisp Apple semi dwarf 15-20 ft. tall Sweet as honey. Crisp, cream-colored flesh is mild, sweet and aromatic, ripens in early September. Root stock EMLA 111 Semi-dwarf

Northern Spy- produces large, high-quality fruit with excellent keeping quality. The Tree is upright, very vigorous and winter hardy. EMLA 7 Semi dwarf.

Manchurian Crab Apple- white blooms
A flowering crab used to pollinate other apple varieties. The white flower is a very prolific pollen producer. Blooms early and through midseason. Fruit is too small for commercial purposes. Rootstock EMLA 7 Semi dwarf 15-20'.

Red McIntosh-This is the Summerland Red McIntosh. The fruit colors early with a deep red hue. A hardy and productive tree, it is sometimes used as a hardy understock for other apple varieties.. Ripens Late September. Rootstock EMLA7, Semi dwarf 10-15'.

Scarlett Spur II Red Delicious: Now comes the next generation of America's earliest, best coloring Red Delicious, Scarlet Spur II. Although Scarlet Spur II finishes coloring about three days earlier than its parent, it has all the winning characteristics of the original - dark mahogany color, crisp white flesh, excellent fruit production, and outstanding type. EMLA 111 Semi standard.

Suncrisp Apples are medium in size with a large top tapering down to a rounder bottom. They have a yellow background overlaid with an orange-red blush; the skin is chewy and often russeted. The flesh is cream-colored and resists browning when cut open, with a starchy and somewhat juicy texture. root stock EMLA 7 Semi dwarf 15-20'.

Lapins Cherry-Self -pollinating and tolerates late frost! One of the few self-pollinating sweet cherry trees. Puts on a brilliant spring show with billows of pink flowers. Deep, dark fruit shape has a purple-red flesh that is sweet, firm and almost meaty. Exquisite fresh eating, right off the tree. Good overall disease-resistance and crack-resistance. Rootstock Mazzard Standard.

Montmorency Cherry

The principal commercial tart cherry grown for processing. Montmorency is bright red on the outside and has clear, yellow flesh inside. The tree is early bearing in July, productive and self-fertile. Tart cherry. Rootstock MAHALEB. Semi dwarf. 15-20'

Rainer Cherry- One of the most in-demand varieties, for both its taste and beauty. Large, yellow fruit with a half-red blush; birds are less attracted, due to the yellow half. Very firm, sweet flesh has a fine texture and distinct, outstanding flavor. Bud-hardy and crack resistant, making it the cherry of choice for backyard gardeners. Stores well. Rootstock Mazzard Standard.

Anjou pear-Fruit firm, juicy and with a superbly rich flavor. Best flavor when stored for one or two months. Ripens in August, Excellent keeper. Rootstock OHXF87 Standard

Bartlett Pear-The leading commercial pear for both canning and fresh fruit sale. The fruit normally is of large size, has a smooth and attractive appearance. Its flesh is tender and juicy, buttery and of high dessert quality. Bears young and tree has a tendency for compact, upright growth which lends itself to dense plantings. Also excellent for home use. Ripens in August. Rootstock OHXF87 Standard.

Red Haven Peach-Tree is vigorous, very bud-hardy and productive. Fruit is medium-sized and colors to a brilliant red. One of the best commercial varieties. Ripens around August. Rootstock seed. Standard 20'

Sugar May Peach-Sweetest peach of its season: mid-June, about one month before Babcock. Very juicy and sweet with fine flavor. High fruit tasting scores. Excellent choice for early season peach. Medium to large size, attractive red skin. Rootstock Lovell. 15-20'.

Goldcot Apricot -An open-pollinated seedling of Perfection. The fruit is medium-size, nearly round. The color of the skin, which is moderately tough and thick, is golden. The flesh of Goldcot is firm and medium-orange in color. Variety is somewhat self-fruitful. Rootstock Seed. Standard 20'

Stanley Prune- The gold standard for prunes. This variety produces abundant crops of oval-shaped fruit with deep purple skin and sweet golden flesh. Tastes great when picked fresh or when dried or canned. Rootstock Peach, Standard 20'
