Tree Descriptions

SEEDLINGS & TRANSPLANTS

Arborvitae -Are fast-growing, easy-to-care-for and the year-round visual interest they bring to a landscape. highly prized as a hedge or screen plant.

Balsam Fir

Soft, waxy, aromatic, likes sun and cool moist well drained soils, paper and lumber, a favorite Christmas tree. **Michigan Native**

Black Spruce

Also called swamp spruce, moist, cool sites, used by wildlife for shelter and small animal food. **Michigan Native**

Blue Spruce

Slow to moderate grower in fertile loams and clays, windbreaks, wildlife and a very popular Christmas tree, blue color varies with nurseries.

Douglas Fir

Grows well on most upland soils except those with high lime content in top soil. **Native to North America**

Hemlock

One of the more shade-tolerant evergreens, it can be sheared as a hedge, or planted for screening. Native to the eastern U.S. resembles Christmas trees. **Michigan Native**

Norway Spruce

Fast grower, does well on well to poorly drained soils, clay and loamy sands, identified by its drooping branches and large cones. windbreaks, timber, pulpwood and wildlife.

Red Cedar

Dense, somewhat prickly blue-green foliage that turns deep purple by late fall. Grows on most soil types except swamp. 30-100' in height. **Michigan Native**

Red Pine

Moderate to fast grower, prefers well drained soil, sand, loam, gravel. Windbreaks, timber, pulpwood and wildlife. Much better choice than Austrian Pine. **Michigan Native**

Serbian Spruce

Tall and slender, with graceful upswept branches, the Serbian spruce is an elegant evergreen tree as a specimen in the landscape. It has glossy dark green needles with slender streaks of white and distinctive purple cones.

White Cedar

Prefers cold, wet sites with slow drainage, but not stagnant water, wider variety of wood uses. The most important winter food of Michigan's whitetail deer herd. **Michigan Native**

White Pine *Our State Tree!* Slow grower at first but once established grows faster, moist sandy loam, but will grow from swamps and sand, timber, windbreaks, pulpwood and wildlife. **Michigan Native**

White Spruce

Slow to moderate grower in fertile loams and clays, faster when established. Lumber, pulpwood, Christmas trees, wildlife. Deer are not overly fond of these. **Michigan Native**

DECIDUOUS

Black Cherry

Grows best in deep, moist soil but, will grow in sandy soils. Wood is hard and strong, useful in furniture making, cherries are sweet and an important food source wildlife, deer mice, chipmunks and squirrels like to eat the pits and store for winter use. **Michigan Native**

Black Walnut

Moderately fast growth in moist sandy loam and silt, intolerant of shade likes open space, not a lawn tree and needs to be planted a distance away from other trees. Nuts are edible for wildlife. The most valuable hardwood in Michigan. **Michigan Native**

Chinese Chestnut- the blight-resistant Chinese chestnut is quick gaining popularity. The sweet-tasting nuts are often roasted for holiday eating. Great for deer.

Hazelnut- Also known as Filbert, deep fertile well drained soils, do not tolerate wet feet, will produce a crop in 3 to 4 years, excellent turkey food source. **Michigan Native**

Mountain Ash-Grows best in rich moist soils, reach only about 15 -25 feet in height with slender trunks, put on a showy floral display in late spring and early summer, flash their bright orange berries in the fall, bird food source, this is not a true ash and is not affected by Emerald Ash Borer. **Michigan Native**

Red Bud-A landscape tree with magenta pink flowers causes heads to turn and smiles to form, a favorite of horticulturists because of its ease of planting, rapid growth, pleasing form and ability to flower when only four to five years old. **Michigan Native**

Red Maple

Fast grower in a variety of soils, nice shade tree with beautiful red fall foliage. **Michigan Native**

Red Mulberry- Juicy, purple flowers cause heads to turn and smiles to form, a favorite of horticulturists because of its ease of planting, rapid growth, pleasing form and ability to flower when only four to five years old **Michigan Native**

Red Oak

Moderately fast growing in well drained, rich, moist loam soils, transplants easily, lumber and wildlife. **Michigan Native**

Silver Maple-Rapid grower in well drained moist soils, graceful foliage, used for lumber, birds , small mammal food source. **Michigan Native**

Sugar Maple-Slow grower in moist to poorly drained fertile soils, hardwood lumber and pulpwood, used for maple sugar. **Michigan Native**

Swamp White Oak-Swamp white oak is a striking tree. The lustrous leaves have a two-tone appearance, dark green on top with a silvery-white underside. Fall color is an orange-gold to yellow in mid-autumn. An excellent shade tree for any landscape. **Michigan Native**

White Birch-Rapid grower in well drained sand, loam, used for reforestation, in yards and by wildlife. **Michigan Native**

White Oak-Slow grower in all but the wettest soils, food source for grouse, small mammals & whitetail. **Michigan Native**

SHRUBS

Butterfly Bush

Full sun to partial shade, slender arching branches, with stalks of fragrant color in lavender, white or magenta, mid-summer to frost.

Choke Cherry-A large, deciduous shrub or small understory tree, choke cherry grows 20-30 ft. tall and often forms thickets. Dense clusters of white flowers are followed by red fruit ripening to dark purple from August to September. They can be made into preserves and jelly. Wildlife, habitat, watershed protection.

Michigan Native

Dogwood, Flowering

Dry to moist soils, beautiful white spring flowers, red fruit, birds

Dogwood, Red Osier

Prefers moist soils, especially along streams, useful for erosion control, white flowers, small white fruit, red branches in winter. Whitetail

Michigan Native

Dogwood, Silky

Moist soils, white flowers, blue fruit, useful for erosion control, birds and small mammals.

Michigan Native

Elderberry

Rich moist soil in sunny location, white flowers, purplish-black fruit, Wildlife and wine making.

Michigan Native

High Bush Cranberry

Tolerates poor soils, prefers cool, moist site, small white to pink flowers, fruit is translucent red berry. Species good for wildlife.

Michigan Native

Lilac- Common Lilac is a purple colored fragrant flowers in May.

Nannyberry

Moist to well-drained soils, white flowers, blue-black fall fruit, called wild raisin, birds and other wildlife.

Michigan Native

Ninebark

Moist soil, large clusters of white flowers, red fruit, wildlife.

Michigan Native

Rose of Sharon

Full sun to light shade, very showy large flowers.

Serviceberry

Well drained variety of soils, edible blue-black fruit, eaten by birds. Aka Juneberry

Michigan Native

Winterberry

Also known as **Michigan Holly**, found in moist soils and occasionally drier soils, easy to grow, small white flowers, but look out when it comes to fall its slender branches are covered with small red berries that remain into winter giving color to the landscape, wildlife.

Michigan Native

Witch Hazel

Bright yellow cluster blooms produce a woody brown nut capsule that when mature, explodes with a snapping pop, medicinal uses and whitetail.

Michigan Native.

GARDEN PLANTS

Asparagus-Mary Washington-Heritage. Open pollinated variety. Medium to large purplish-tinged, tightly-budded spears. Grows well, one of the older, tried and true Varieties.

Blueberry--one of each plant.

Early to Mid Season crop. It has a long harvest period. This fruit is large with good flavor. Excellent color and a firm fruit. Blueberries need a well-drained soil, with a pH balance between 4.5 and 5.5.

Grapes, Concord

Vigorous and hardy, ideal for jelly and juice.

Grapes, Niagara

Popular white grape, excellent flavor, table use and wines.

Raspberries-Heritage.

Harvest starts in early fall and will last until extremely cold weather. .

Strawberries- Seascape-A day neutral type of strawberry variety. It is noteworthy for high flavor, high yield, large fruit size, firmness, symmetry, attractive appearance and flexibility in planting requirements

Hibiscus Root- commonly known as hardy hibiscus or swamp rose mallow, is a vigorous, sturdy, rounded, somewhat shrubby, hairy-stemmed, woody-based perennial of the mallow family. It typically grows to 3-7' tall and to 2-4' wide. It is native to wet spots

Fountain Grass (Pennisetum alopecuroides) Mound forming plant that grows well in fertile, moist, wet or well drained soil. It prefers full sun to very light shade. Great with other perennials as a specimen plant. Mass planting produces a colorful display when in bloom. Flowers like soft cattails up to 3' tall in July through early winter. Flower color changes from whitish purple to coppery purple.

Liatis - bulbs-Also known as blazing star or gay feather perennial. Plant bulbs three to four inches apart and five inches deep. Flowers in July / August with purple or white spikes. Hardy in zones 3-4 with mulch, 5-9 without mulch. Attracts butterflies.

Echinacea: Tangerine orange flowers are produced with dark cones. Earlier to bloom. Cheerful brightly colored flowers, coneflowers are a mainstay in today's garden. Be sure to leave some spent blooms on the plants in the fall because their seeds provide winter food for finches and other birds. The dried seed heads also provide architectural interest in the winter.

Heliopsis have traditionally been an excellent tall perennial for the middle or back of the flower border. It has a bushy, well-branched form and glossy, deep green, triangular leaves - a real workhorse in the garden! Use this plant in combination containers, as a cut flower, or to attract butterflies to your garden.

Heuchera are easy to grow and blend easily with most other perennials in the landscape. Because of their low, mounding habit, they are often used as edging along paths or in containers. Try cutting a few of the tall flower scapes for fresh bouquets.

Lavandula One of the darkest hued lavenders from seed. Deep purple-blue flowers do not bleach during the summer. This variety Deer and rabbits tend to avoid this highly scented plant, so you're sure to enjoy it all summer long.

Monarda is well-behaved in the garden, it stays where you plant it and doesn't run around. The blossoms have sweet nectar that is highly attractive to butterflies, hummingbirds, and honeybees and the aromatic foliage is naturally deer resistant.

Fruit Tree Descriptions

Aztec Fuji Apple-The deep pinkish-red hue delivers in even difficult-to-color areas. The fruit maintains the sweet flavor and crisp crunch expected from the Fuji variety. **EMLA 111**

Cortland Apple-Its flavor is sweet compared to McIntosh, and it has a flush of crimson against a pale yellow background sprinkled with short, dark red stripes and gray-green dots. **EMLA 111**

Gibson Golden Delicious: Apple- A russet-resistant of the original. Fruit is firm, medium to large with the classic Golden Delicious flavor. The tree is spreading, productive and easy to manage. Fruit thinning is required to maintain annual bearing. **G 969**

Granny Smith Apple- This green apple import from Australia has become an American standard. Consumers like it for its tart, crisp and juicy flavor and outstanding keeping qualities. Is used for both fresh packs and processing and produces large, round fruit. The tree is vigorous and sets crops early. Ripens in November. **G 969**

Royal Red Honey Crisp Apple- Sweet as honey. Crisp, cream-colored flesh is mild, sweet and aromatic, ripens in early September. **BUD 118**

Manchurian Crab Apple- white blooms A flowering crab used to pollinate other apple varieties. The white flower is a very prolific pollen producer. Blooms early and through midseason. Fruit is too small for commercial purposes. **EMLA 111**

Nova Spy Apple-Fruit has a sweet, pleasant flavor, making it very good for fresh eating. It bakes well and is a good keeper. This variety has shown good resistance to apple scab. **EMLA 7**

Red McIntosh Apple -This is the Summerland Red McIntosh. The fruit colors early with a deep red hue. A hardy and productive tree, it is sometimes used as a hardy understock for other apple varieties.. Ripens Late September. **EMLA 111**

Scarlett Spur II Red Delicious Apple -Now comes the next generation of America's earliest, best coloring Red Delicious, Scarlett Spur II. Although Scarlett Spur II finishes coloring about three days earlier than its parent, it has all the winning characteristics of the original - dark mahogany color, crisp white flesh, excellent fruit production, and outstanding type. **EMLA 111**

Wolf River Apple- Wolf River is an antique variety best known for its large size. It is an early-season apple, excellent for cooking and baking. The finish is a very pale red blush on yellow background. Wolf River is considered somewhat scab resistant and is a very winter hardy tree. **Geneva 890**

Black Gold Cherry-BlackGold™ is a self-fertile dark sweet cherry. It ripens approximately seven days later than Bing, is late blooming, and somewhat frost resistant. The variety demonstrates good hardiness in cooler growing areas. BlackGold™ is a good pollinizer for late-blooming varieties. **MAZZARD**

Montmorency Cherry-The principal commercial tart cherry grown for processing. Montmorency is bright red on the outside and has clear, yellow flesh inside. The tree is early bearing in July, productive and self-fertile. Tart cherry. **MAZZARD**

Emperor Francis Cherry-A large, high-quality yellow cherry of the Napoleon type, but less susceptible to cracking. The color of the two fruits is similar except that those of Emperor Francis have more red blush. Tree is hardy, vigorous and very productive. **MAHALEB**

Anjou Pear-Fruit firm, juicy and with a superbly rich flavor. Best flavor when stored for one or two months. Ripens in August, Excellent keeper. **OHXF97**

Bartlett Pear-The leading commercial pear for both canning and fresh fruit sale. The fruit normally is of large size, has a smooth and attractive appearance. Its flesh is tender and juicy, buttery and of high dessert quality. Bears young and tree has a tendency for compact, upright growth which lends itself to dense plantings. Also excellent for home use. Ripens in August. **OHXF87**

Loring Peach: A large, firm, yellow-fleshed freestone with attractive red color over a yellow ground color. Loring has been an important commercial peach variety for many years and is considered one of the best canning and freezing varieties. The trees are vigorous, productive and resistant to bacterial spot. **SEED**

Red Haven Peach-Tree is vigorous, very bud-hardy and productive. Fruit is medium-sized and colors to a brilliant red. One of the best commercial varieties. Ripens around August. **LOVELL**

Stanley Prune- The gold standard for prunes. This variety produces abundant crops of oval-shaped fruit with deep purple skin and sweet golden flesh. Tastes great when picked fresh or when dried or canned. **SEED**

Arenac Conservation District
