## SEEDLINGS & TRANSPLANTS

**Arborvitae** -Are fast-growing, easy-to-care-for and the year-round visual interest they bring to a landscape. highly prized as a hedge or screen plant.

### **Balsam Fir**

Soft, waxy, aromatic, likes sun and cool moist well drained soils, paper and lumber, a favorite Christmas tree. **Michigan Native**

### **Black Spruce**

Also called swamp spruce, moist, cool sites, used by wildlife for shelter and small animal food. **Michigan Native**

### **Blue Spruce**

Slow to moderate grower in fertile loams and clays, windbreaks, wildlife and a very popular Christmas tree, blue color varies with nurseries.

### **Douglas Fir**

Grows well on most upland soils except those with high lime content in top soil. **Native to North America**

### **Hemlock**

One of the more shade-tolerant evergreens, it can be sheared as a hedge, or planted for screening. Native to the eastern U.S. resembles Christmas trees. **Michigan Native**

### **Norway Spruce**

Fast grower, does well on well to poorly drained soils, clay and loamy sands, identified by its drooping branches and large cones. windbreaks, timber, pulpwood and wildlife.

### **Red Cedar**

Dense, somewhat prickly blue-green foliage that turns deep purple by late fall. Grows on most soil types except swamp. 30-100' in height. **Michigan Native**

### **Red Pine**

Moderate to fast grower, prefers well drained soil, sand, loam, gravel. Windbreaks, timber, pulpwood and wildlife. Much better choice than Austrian Pine. **Michigan Native**

### **White Cedar**

Prefers cold, wet sites with slow drainage, but not stagnant water, wider variety of wood uses. The most important winter food of Michigan's whitetail deer herd. **Michigan Native**

**White Pine** *Our State Tree!* Slow grower at first but once established grows faster, moist sandy loam, but will grow from swamps and sand, timber, windbreaks, pulpwood and wildlife. **Michigan Native**

### **White Spruce**

Slow to moderate grower in fertile loams and clays, faster when established. Lumber, pulpwood, Christmas trees, wildlife. Deer are not overly fond of these. **Michigan Native**

## DECIDUOUS

### **Black Cherry**

Grows best in deep, moist soil but, will grow in sandy soils. Wood is hard and strong, useful in furniture making, cherries are sweet and an important food source wildlife, deer mice, chipmunks and squirrels like to eat the pits and store for winter use. **Michigan Native**

**Chinese Chestnut**- the blight-resistant Chinese chestnut is quick gaining popularity. The sweet-tasting nuts are often roasted for holiday eating. Great for deer.

**Hazelnut**- Also known as Filbert, deep fertile well drained soils, do not tolerate wet feet, will produce a crop in 3 to 4 years, excellent turkey food source. **Michigan Native**

**Mountain Ash**-Grows best in rich moist soils, reach only about 15 -25 feet in height with slender trunks, put on a showy floral display in late spring and early summer, flash their bright orange berries in the fall, bird food source, this is not a true ash and is not affected by Emerald Ash Borer. **Michigan Native**

**Redbud**-A landscape tree with magenta pink flowers causes heads to turn and smiles to form, a favorite of horticulturists because of its ease of planting, rapid growth, pleasing form and ability to flower when only four to five years old. **Michigan Native**

### **Red Maple**

Fast grower in a variety of soils, nice shade tree with beautiful red fall foliage. **Michigan Native**

**Red Mulberry**- Juicy, purple flowers cause heads to turn and smiles to form, a favorite of horticulturists because of its ease of planting, rapid growth, pleasing form and ability to flower when only four to five years old **Michigan Native**

### **Red Oak**

Moderately fast growing in well drained, rich, moist loam soils, transplants easily, lumber and wildlife. **Michigan Native**

**Silver Maple**-Rapid grower in well drained moist soils, graceful foliage, used for lumber, birds, small mammal food source. **Michigan Native**

**Swamp White Oak**-Swamp white oak is a striking tree. The lustrous leaves have a two-tone appearance, dark green on top with a silvery-white underside. Fall color is an orange-gold to yellow in mid-autumn. An excellent shade tree for any landscape. **Michigan Native**

**White Birch**-Rapid grower in well drained sand, loam, used for reforestation, in yards and by wildlife. **Michigan Native**

**White Oak**-Slow grower in all but the wettest soils, food source for grouse, small mammals & whitetail. **Michigan Native**

### **Arenac Conservation District**

**always recommends Michigan Native trees and shrubs for the best survivability and diverse species to ensure a healthy stand.**

## SHRUBS

### Butterfly Bush

Full sun to partial shade, slender arching branches, with stalks of fragrant color in lavender, white or magenta, mid-summer to frost.

### Dogwood, Flowering

Dry to moist soils, beautiful white spring flowers, red fruit, birds and small mammals. **Michigan Native**

### Dogwood, Red Osier

Prefers moist soils, especially along streams, useful for erosion control, white flowers, small white fruit, red branches in winter. Whitetail **Michigan Native**

### Dogwood, Silky

Moist soils, white flowers, blue fruit, useful for erosion control, birds and small mammals. **Michigan Native**

### Elderberry

Rich moist soil in sunny location, white flowers, purplish-black fruit, Wildlife and wine making. **Michigan Native**

### High Bush Cranberry

Tolerates poor soils, prefers cool, moist site, small white to pink flowers, fruit is translucent red berry. Species good for wildlife. **Michigan Native**

### Lilac

Common Lilac is a purple colored fragrant flowers in May.

### Nannyberry

Moist to well-drained soils, white flowers, blue-black fall fruit, called wild raisin, birds and other wildlife. **Michigan Native**

### Ninebark

Moist soil, large clusters of white flowers, red fruit, wildlife. **Michigan Native**

### Serviceberry

Well drained variety of soils, edible blue-black fruit, eaten by birds. **Aka Juneberry Michigan Native**

### Winterberry

Also known as **Michigan Holly**, found in moist soils and occasionally drier soils, easy to grow, small white flowers, but look out when it comes to fall its slender branches are covered with small red berries that remain into winter giving color to the landscape, wildlife. **Michigan Native**

### Witch Hazel

Bright yellow cluster blooms produce a woody brown nut capsule that when mature, explodes with a snapping pop, medicinal uses and whitetail. **Michigan Native**

#### **Join our Earth Team Volunteers !**

Arenac Conservation District is looking for volunteers to help sort and pack the tree orders prior to pick up.

If you would like to help please contact us at 989.846.4565 ext. 5 or dawn.hergott@mi.nacdn.net

Thank You!

## GARDEN PLANTS

**Asparagus-Jersey Giant:** Male Hybrid garden plant. Its energy goes into producing spears. Verry productive plant. Disease resistant. Yields 2-4 times more spears than older varieties.

**Blueberry: Bluecrop/Earliblue:** one of each plant.

Early to Mid Season crop. It has a long harvest period. This fruit is large with good flavor. Excellent color and a firm fruit. Blueberries need a well-drained soil, with a pH balance between 4.5 and 5.5.

### **Grapes, Concord**

Vigorous and hardy, ideal for jelly and juice.

### **Grapes, Niagara**

Popular white grape, excellent flavor, table use and wines.

### **Raspberries:** Heritage.

Harvest starts in early fall and will last until extremely cold weather. .

**Strawberries: Seascape-**A day neutral type of strawberry variety. It is noteworthy for high flavor, high yield, large fruit size, firmness, symmetry, attractive appearance and flexibility in planting requirements.

**Saskatoon Berry:** Are very healthy! Full antioxidants, vitamin C, and calcium. Having more than one bush will increase production, do not need high ph count. Bigger berries than blueberries.

**Hibiscus Root:** commonly known as hardy hibiscus or swamp rose mallow, is a vigorous, sturdy, rounded, somewhat shrubby, hairy-stemmed, woody-based perennial of the mallow family. It typically grows to 3-7' tall and to 2-4' wide. It is native to wet spots

**Fountain Grass** (*Pennisetum alopecuroides*): Mound forming plant that grows well in fertile, moist, wet or well drained soil. It prefers full sun to very light shade. Great with other perennials as a specimen plant. Mass planting produces a colorful display when in bloom. Flowers like soft cattails up to 3' tall in July through early winter. Flower color changes from whitish purple to coppery purple.

**Liatis bulbs:** Also known as blazing star or gay feather perennial. Plant bulbs three to four inches apart and five inches deep. Flowers in July / August with purple or white spikes. Hardy in zones 3-4 with mulch, 5-9 without mulch. Attracts butterflies.

**Echinacea "The Price is White"** Very wide, overlapping, horizontal white petals with a green cone and yellow pollen. Flowers are 5" wide and held over top dark green foliage.

**Iris "Butter and Sugar"** Creamy white standards and butter yellow falls, both with greenish yellow veins. Blooms in early summer with a possible rebloom later in the season Siberian irises are haled for their

**Dianthus "Black Cherry Frost"** Rich, semi-double velvety red flowers have a fine, serrated near white edges. Blooms early summer with quick shearing of the flowers will encourage fall blooms.

**Hosta "Curly Fries"** Want fries with your order? This small sized Hosta is the perfect for your garden, forms an arching, wiggly clump of rippled, narrow leaves. Mature plants will develop red speckled petioles top the plant in midsummer.

# Fruit Tree Descriptions

**Fuji Apple:** The deep pinkish-red hue delivers in even difficult-to-color areas. The fruit maintains the sweet flavor and crisp crunch expected from the Fuji variety. **EMLA 7**

**Cortland Apple:** Its flavor is sweet compared to McIntosh, and it has a flush of crimson against a pale yellow background sprinkled with short, dark red stripes and gray-green dots. **EMLA 7**

**Gibson Golden Delicious: Apple:-** A russet-resistant of the original. Fruit is firm, medium to large with the classic Golden Delicious flavor. The tree is spreading, productive and easy to manage. Fruit thinning is required to maintain annual bearing. **EMLA 7**

**Granny Smith Apple:** This green apple import from Australia has become an American standard. Consumers like it for its tart, crisp and juicy flavor and outstanding keeping qualities. Is used for both fresh packs and processing and produces large, round fruit. The tree is vigorous and sets crops early. Ripens in November. **EMLA 7**

**Honey Crisp Apple:** Sweet as honey. Crisp, cream-colored flesh is mild, sweet and aromatic, ripens in early September. **EMLA 7**

**Manchurian Crab Apple:** white blooms A flowering crab used to pollinate other apple varieties. The white flower is a very prolific pollen producer. Blooms early and through midseason. Fruit is too small for commercial purposes. **EMLA 7**

**Nova Spy Apple-**Fruit has a sweet, pleasant flavor, making it very good for fresh eating. It bakes well and is a good keeper. This variety has shown good resistance to apple scab. **EMLA 7**

**Red McIntosh Apple :** This is the Summerland Red McIntosh. The fruit colors early with a deep red hue. A hardy and productive tree, it is sometimes used as a hardy understock for other apple varieties.. Ripens Late September. **EMLA 7**

**Scarlett Spur II Red Delicious Apple :**Now comes the next generation of America's earliest, best coloring Red Delicious, Scarlett Spur II. Although Scarlett Spur II finishes coloring about three days earlier than its parent, it has all the winning characteristics of the original - dark mahogany color, crisp white flesh, excellent fruit production, and outstanding type. **EMLA 111**

**Wolf River Apple:** Wolf River is an antique variety best known for its large size. It is an early-season apple, excellent for cooking and baking. The finish is a very pale red blush on yellow background. Wolf River is considered somewhat scab resistant and is a very winter hardy tree. **EMLA 7**

**Balaton Cherry:** Tart cherries are large and firm. Superb for pies or juice. Fruit ripens over a period of time. Self-fertile. **MAZZARD**

**Balaton Cherry:-** Is a cherished variety renowned for its versatility and luscious fruit, reminiscent of the Montmorency but larger and firmer in texture. This tree offers an extended cherry-picking season, bright red cherries for a longer harvest. Self pollinating **MAZZARD**

**Jubileum Cherry:** Is a early season sweet-tart cherry. Large dark-red cherries have a tangy flavor. Fresh eating and juice making. Self-pollinating. **MAZZARD.**

**Lapins Cherry:** Produces dark, sweet fruit. Excellent quality and rich flavor, Crack resistant, heavy Producer, self-pollinating . **MAZZARD**

**Rainier Cherry:** Large, yellow fruit with a half-red blush; birds are less attracted, due to the yellow half. Very firm, sweet flesh has a fine texture and distinct, outstanding flavor. Bud-hardy and crack-resistant, making it the cherry of choice for backyard gardeners. Self pollinating **MAZZARD**

**D'Anjou Pear-**Fruit firm, juicy and with rich flavor. Best flavor when stored for one or two months. Ripens in August, Excellent keeper. Self pollinating **OHXF 87**

**Bartlett Pear-**The leading commercial pear for both canning and fresh fruit sale. The fruit normally is of large size, has a smooth and attractive appearance. Its flesh is tender and juicy, buttery and of high dessert quality. Bears young and tree has a tendency for compact, upright growth which lends itself to dense plantings. Also excellent for home use. Self pollinating Ripens in August. **OHXF 87**

**Loring Peach:** A large, firm, yellow-fleshed freestone with attractive red color over a yellow ground color. Loring has been an important commercial peach variety for many years and is considered one of the best canning and freezing varieties. The trees are vigorous, productive and resistant to bacterial spot. Self pollinating **SEED**

**Red Haven Peach-**Tree is vigorous, very bud-hardy and productive. Fruit is medium-sized and colors to a brilliant red. One of the best commercial varieties. Ripens around August. Self pollinating **SEED**

**Hardired Nectarine:** Tree is vigorous, very bud-hardy and productive. Fruit is medium-sized and colors to a brilliant red. One of the best commercial varieties. Ripens around August. **LOVELL**

**Stanley Prune-** The gold standard for prunes. This variety produces abundant crops of oval-shaped fruit with deep purple skin and sweet golden flesh. Tastes great when picked fresh or when dried or canned. Self pollinating **SEED**
