

PILLOWCASES

Materials Needed:

Cotton fabric 13" x 44-45" long (just cut the width of the pillowcase on the fold of the fabric).

Step 1: With right sides together, start sewing $\frac{1}{4}$ " seam from the bottom right-hand corner of pillow (at the fold) down the side and then across the top only about 2". Leave the middle section unsewn to allow for stuffing. Starting about 2" from the opposite edge, continue across the top and turn down the other side, sewing down to the bottom (folded end).

Step 2: Turn pillowcase right-side out, stuff with plarn scraps and stitch opening at top closed.

You now have a completed plarn pillow!
