

CorelDRAW[®] 3-7 GRAPHICS SUITE

Training Packages

Engraver's Choice provides:

- **Full Instruction for CorelDRAW:** CorelDRAW is one of the most Popular Graphics Tools in the world, I have been a Corel Training Partner for over 20 Years. It works extremely well with LaserWORKS and EngraveLab.
- **Work-spaces:** Choose from a variety of work-spaces designed for different proficiency levels and specific tasks: Page Layout and Illustration, a Classic option for longtime users, an option for a look & feel of Photoshop/Illustrator.
- **Easy to Understand Show & Go Videos :** There is one thought per page and videos that are broken down into four sections with 3 full Color Manuals included for print out, for Lasers, Rotary Engravers and Sandblasters.
- **Learn Photo Effects:** Spice up your photos with vibrance, grayscale and photo filter effects for Laser processing.
- **Smoothing Vector Objects:** Remove jagged edges, reduce nodes in curved objects with the new Smooth tool.
- **We Teach 'The Five Steps':** We teach Five simple to follow steps that begin all Graphical Layouts.
- **Full Installation:** From PC-2-PC, One-on-One, to Classroom instruction sessions at our facility or at your shop.
- **Process Variable Text:** We show you how to use variable data using the Print Merge and/or 'Laser Jump Start' PLUG-IN; for nameplates from Excel spreadsheets to CSV files these can be easily processed..
- **Learn Masking:** Specialized signage uses Masking so you will learn to use it for images into advanced graphics.
- **Vector and Bitmap Pattern Fills:** Preview, apply, and interactively transform both vector pattern and bitmap pattern fills using enhanced controls in the Object Properties docker.
- **Advanced Open-Type Support:** Take greater advantage of advanced Open-Type typography features such as: contextual and stylistic alternates, fractions, ligatures, ordinals, ornaments, small caps, swashes, and more.
- **Vectorization:** Accurately convert your artwork into vectored objects that can be engraved as a sharp, clean vector graphic using a variety of Offsets and Fills.
- **Learn Simple customization:** Tailor the toolbox, dockers, and property bars to suit your workflow using the new Quick Customize buttons.
- **Full Instruction for Align and Distribute docker:** The new Align and Distribute docker provides quick and easy access to all available alignment options so that you can position objects with precision.
- **Support for Most Lasers and Sandblasters:** Outfit your shop with a GREAT software package that supports most of your production work-flows. Full files input from most CAD/CAM programs in the industry.
- **Sample Jobs and Clipart:** Get going quickly with more than 375 professionally designed templates and more than 2,000 vehicle templates, plus Clipart galore.
- **Timely Support:** We support you from **8-8 M-F and 10-2 SAT.** PST, – Phone Support and PC-2-PC instruction.
