

Major References for Engraver's Choice

Mary Sullivan, Kern Trophy

Joe has always been able to handle any problem I have had with any of my equipment or computers. He always takes my call and has never rushed to get off the phone. He handles the problem from start to finish and gets me back in production quickly. He is aware that time is money and does what ever he can to fix my problems.

Joe is an expert in the laser engraving business and I would recommend Joe to any business looking to add or replace commercial equipment. Joe is a true consultant, advising his clients on the right machine products and ways to market their business services. I have worked with Joe on many transactions with mutual clients; he is the best in the business.

Boss Laser is fantastic to work with. The customer service and the Tech Support are wonderful to talk to and Aaron has always been able to walk us through any of our issues and tell us exactly what to do to fix it. We have had our Boss Laser now for 3 years and not once have we had any complaints. Thank you Boss Laser for great service!

LS3655-150 watts

I have had a great time working with Boss Laser's tech support team. My questions are answered promptly and fully. They have been extremely helpful in providing specifications for hard to find replacement parts, an o-ring in my specific case. We have one of their LS3655 cutters in our fab lab which is primarily used by college age students. They love the machine and have found it easy to use for a variety of projects. I would recommend Boss Laser to just about anyone looking for an affordable and powerful laser system.

Our experience with Boss has been outstanding. We've had a few small glitches and each time customer service has been quick to respond with the issue resolved. We're using the 3655 in a design lab at an elementary school and it has been game changer in what students can design. We highly recommend Boss Lasers.

LS3655-150

Boss's laser support has always helpful and they really went above and beyond yesterday and shipped me a critical part to keep production going, even after their shipping deadline. I would recommend Boss Lasers to anyone and largely in part due to how helpful their support has been over the past couple of years!

He took us through step by step from how to set the laser up, safety, operation, trouble-shooting, etc. He was enthusiastic, knowledgeable, and answered all our questions. We also feel comfortable in knowing if we have questions or need help in the future he will be willing and able to assist us.
