EngraveLab BOSS Edition II PhotoLaser Plus is the Photo and Basic Laser package in the EngraveLab family of products. The perfect companion product for CorelDRAW & Adobe, process digital images in PhotoLaser Plus and ensure the highest quality laser engraving output.

- **Superior Workflow:** An Easy 1-2-3- step process, go from Corel/Adobe to PhotoLaser Plus to production without having to jump back and forth between applications.

- **Third-Party Interface:** Seamless integration between CorelDRAW/Adobe and PhotoLaser Plus via the Corel application launcher.

- **Direct Laser Output:** Send jobs to your laser engraver directly from PhotoLaser Plus.

- **Conversion Generator:** Convert color, grey scale or monochrome photos into ready to cut vector files in one easy step!

- **Preview Projects:** On Screen Job Preview. Simulate final output on different materials.

- **Raster & Vector Support:** Support for both raster engraving and vector cutting. Cut shapes directly from substrates.

- **Name Badge and Variable Text:** Text condense feature ensures automatic fit to nameplates/badges.

- **Additional Text Input:** Create badges quickly and easily. Variable data support using our unique "Badging" feature provides an instant way in which to substitute text or numbers in a single layout.

- **Photo Laser Plus:** Use the stocked Library of Dither Routines and add or adjust this powerful tool for Photo Processing. Use a variety of materials and see an accurate preview of the plate before lasering it.

- **Interactive Adjustment:** Adjust routines on the fly or use the quick key to go to a 'tried and true' formula.

- **Timely Support:** We support you from **Regional to National** – Phone Support and PC-2-PC instruction.
