

EngraveLab

Training Packages

Engraver's Choice provides:

- **Complete Instruction for EngraveLab:** *EngraveLab is the most powerful graphics tool for our industry that I have trained with in my 25 Plus years (Package includes, LaserCut and Q1e Training).*
- **Seamless interface with Adobe Illustrator, CorelDRAW, & Photoshop:** No need to export or import files. Simply drop your graphic elements directly into EngraveLab from their native application, with Presets & Defaults.
- **Easy to Understand Show & Go Videos :** There is one thought per page and videos that are broken down into four sections with a full Color Manual included for print out.
- **Photo & Image Automation:** Easily convert images into sharp, impressive laser etched graphics across most organic surface, this processing produces stunning, detailed laser etched pictures on all the latest materials.
- **Page Generator:** Our Smart Tool training gives quick page layout from Columns to Kerning.
- **We Teach 'The Five Steps':** *We teach Five simple to follow steps that begin all Graphical Layouts.*
- **Full Installation:** From PC-2-PC, One-on-One, to Classroom instruction sessions at our facility or at your shop.
- **Variable Data Support / Badges:** Automate production of identical layouts, multiple copies that contain variable content variations. Design, create badges, name plates, part or sequential serial numbers with variable text & Bar-codes from E-mails & text files to Excel spreadsheets for both batch and multiple unit plates.
- **Learn Masking:** Specialized signage uses Masking so you will learn to use it for images into advanced graphics.
- **EngraveLab BOSS Edition II:** BOSS and Cadlink have created and full Graphics Package that contain default and preset specifically designed to runs with LaserWORKS.
- **True-Nesting:** Find out how easy it is the group like a puzzle items on the screen into specific area of a Sheet of Material and thus save money on Material and processing costs.
- **Vectorization:** Accurately convert your artwork into vectored objects that can be engraved as a sharp, clean vector graphic using a variety of Offsets and Fills.
- **Simple Conversion of Multi-line Fonts:** Learn to use Engraving-ready Single Line Fonts: create your own engraving fonts, don't buy them! Easily convert TrueType and Adobe PFB fonts into single line fonts.
- **Govern Tool Paths:** Get training in engraving extremely fine font and image details, in-line/outlines, order of processing, lead in/out for advanced vector cutting and more.
- **Support for most Laser and Rotary Engravers:** Outfit your shop with a single software package that supports all of your production work-flows. Economical, standardized solutions for less expense.
- **Sample Jobs and Clipart:** We include a Full Materials Library, a set of Project Jobs Plus full Clipart Library.
- **Timely Support:** We support you from **8-8 M-F and 10-2 SAT. PST.** – Phone Support and PC-2-PC instruction.
