Eco Friendly Environmental Managment

At **Affiliated Construction Enterprises**, we offer an eco-friendly COVID-19 disinfectant spraying service that prioritizes both health and environmental responsibility. Our non-toxic disinfectants effectively eliminate viruses and bacteria, including COVID-19, while being safe for people, pets, and the planet. We ensure a thorough application, providing businesses and homes with a clean, sanitized

Janitorial Services

We provide a service that is tailored to the specific needs of your business, no matter how big or small it is. Our cleaners are highly trained to ensure that every detail is taken care of during your facility's cleaning services. Our services focus on:

- **Customization:** We adjust our services to fit the specific needs of your business, guaranteeing a clean that exceeds your expectations.
- **Attention to detail:** We are dedicated to paying close attention to every detail to ensure that nothing is missed.
- **Health and safety:** Our cleaning practices are designed to prevent cross-contamination and promote a safe and healthy environment. We use chemicals that are safe for respiratory systems and the latest cleaning methods to eliminate dirt, dust, pathogens, and more.
- **Sanitization and disinfection:** We make sure that your building is safe from illness by providing thorough office sanitization and disinfection services to reduce downtime caused by sick employees.
- **Green cleaning services:** We use eco-friendly cleaning chemicals, reusable microfiber towels, HEPA filtration vacuums, and 100% post-consumer recycled tools and materials to promote environmental responsibility.
- **Professionalism and reliability:** Our cleaners are uniformed, carry identification, undergo extensive training, and are fully insured, ensuring a professional and reliable service every time.

Structural Engineering

Our structural engineering team is dedicated to creating buildings that are both resilient and environmentally responsible.

We specialize in designing structures that withstand environmental challenges while utilizing sustainable materials and construction methods. Affiliated Construction Enterprises focuses on structural integrity, safety, and sustainability, ensuring that our projects contribute to the longevity and sustainability of the built environment.

Site Engineering

At Affiliated Construction Enterprises, our site engineering services ensure that every project begins with a solid foundation, both literally and environmentally. We carefully assess land characteristics, terrain, and environmental impact to design efficient and sustainable infrastructure solutions. From grading and drainage to utilities and roadways, we use eco-friendly practices to balance functionality with environmental preservation, ensuring that each site is developed with minimal ecological disturbance.

Demolition

Our demolition services are conducted with a strong commitment to environmental sustainability. We prioritize safe, efficient, and responsible demolition practices, focusing on recycling and reusing materials to minimize waste. Our approach helps reduce the environmental impact of demolition projects while supporting broader sustainability goals.

Site Development

Our site development services are guided by a commitment to environmental stewardship and efficiency. We carefully plan and execute site developments with a focus on minimizing ecological impact, using sustainable practices to manage resources and reduce waste. Our goal is to create functional, aesthetically pleasing spaces that harmonize with their natural surroundings while adhering to the highest standards of environmental responsibility.
