

A parishioner's cousin Scott who is 53 has Leukemia and will be needing blood transfusions. He has B negative blood. He is looking for a donor with either B negative blood or O negative (universal donor) that has NOT been vaccinated.

Please reach out to as many people as you can to see if we can find donors for him.

Please contact Diane at 516-528-8033 or Denise at 516-286-4101

If someone can be a donor, Diane and/or Denise will email them a doctor's form with Scott's name on it. They will need to bring this form with them to Long Island Blood Service in Melville. Thank you.

Please keep Scott and his family in your prayers.
