
Three Ways Your Organization Can Breathe Easier While Operating During The Pandemic

Cutting-edge advances in technology provide organizations access to operational solutions with high efficacy and confidence during uncertain times.

AIRPURE ™

Overview

Until recently; face coverings, social distancing, screening procedures and voluntary reporting were the only viable solutions for providing safety for organization to operate safely during the COVID-19 pandemic.

Unfortunately, there are too many points of safety compromise and uncertainty that can cause catastrophic operational disruption that could lead to downtime, shortfall and losses of an organization's most valuable resource... PEOPLE.

*This white paper will provide a review of the types of products that a detailed narrative of technological solutions that dramatically decrease operational anxiety. Most importantly, as you read you will learn solutions provided to you by AIRPURE™, that will increase efficacy and protect your organization against safety compromise, allowing you to **Breathe Easier**.*

Disclosure

*The AIRPURE™ solution is not a **MEDICAL DEVICE**, it is not a **A CURE**, and it was not placed in to **CLINICAL TRIALS**. The AIRPURE™ solution is **NOT** currently endorsed by the FDA, The CDC, or the Department of Health and Human Services...*

*AIRPURE™ solution is based on sound indisputable science, highly reliable technology, and is guaranteed to do exactly what it claims to do; Allow you to **BREATHE EASIER** during this pandemic and operate near our **TRUE NORMAL** by **REMOVING** all toxins, allergens, and disease causing microbes from the air.*

“ The AIRPURE Solution is Overkill...

to finding a way to live, work, and play during the pandemic. When all the current solutions in play are the worst band-aid when an organ transplant is needed and COMPLETELY rely on people to be honest- AIRPURE takes the approach of providing a system to people honest and a 99% efficient safety barrier.”

-Andre M Pettis
CEO, AIRPURE™

AIRPURE ™
EXPLORING ALL THE WAYS TO HELP YOU BREATHE EASIER™

COVID-19 Procedures vs. The *AIRPURE™* solution

Every procedure that has been implemented for COVID-19 has been an ineffective band-aid to human nature, agenda and fear. Face coverings have an arguable effectiveness but it depends on the change out of disposables, quality of construction and proper wear. Social-distancing requires the maintenance of person-to-person distance with human discipline applied. Screening that includes temperature and symptom checks, while highly effective depend greatly on the honesty and rationality of the subject. COVID-19 procedures provide direct focus on the people and not the coronavirus that causes COVID-19.

While the coronavirus is highly contagious and currently not specifically airborne, it can be transmissible from particle suspensions found in droplets from a person coughing, sneezing, and talking just a few feet away.

The opportunity is found in dealing with those particles in the air.

The *AIRPURE™* solution applies proven science and advanced technology to naturally clear and clean the air of those dangerous particles.

Negative Ion, Multi-filter, and UV light Technology Air Purifiers

The *AIRPURE™* solution takes the proven science of a negative ion generator to neutralize microbes, bacteria, dust, allergens, smoke, and pollution particles; coupled with a seven stage filtering system (including HEPA-12, activated carbon, and PP Filters) and a microbe destroying UV light to disinfect, deodorize and purify the air.

This technology provides *AIRPURE™* with 3 ways to help your organization to ***breathe easier.***

The #1 Way To Breathe Easier... **AIRPURE™ Nature Room System (NRS)**

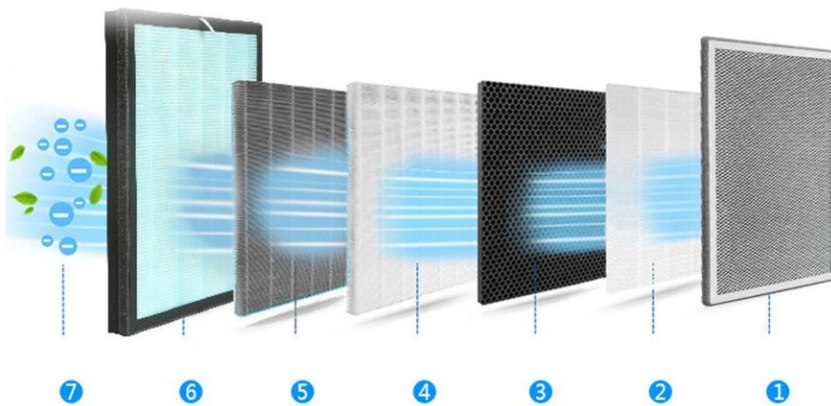

AIRPURE™

AIRPURE™ Nature Room System (NRS)

Filter Stages

PP Pre Filter+HEPA
+Carbon Filter+Photocatalysis
+UV Lamp+Cold Catalyst+Anion

Specifications:

The NRS is a low noise device which from low drive to high drive puts out -10 to -30 dB of noise.

It treats the air of a space that is approx. 650 sq ft. With 5 million negative ions per second to neutralize microbes, allergens and odors.

The UV light is an 8000 hour life unit rated at 254 nanometer wavelength to specifically target and destroy disease causing microorganisms.

The NRS has a small footprint, is energy efficient, and powerful delivering clean air at a rate of 4520 sq ft per hour on 65 watts of power under 110 VAC.

UV Light

The LRN Air Pure System eliminates the need for social distancing and face coverings.

This technology takes your organization back to a classic normal and allows your organization to continue to operate on its core competency without the triage of COVID-19 procedures.

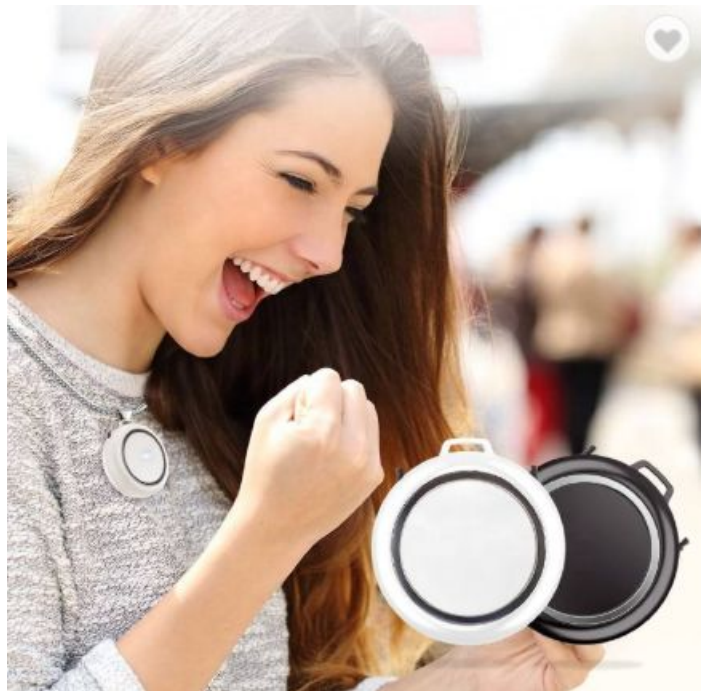

This is the prime solution for the organizations facility, however there are two more solutions based on the same technology that is specifically designed for Personal and Vehicle opportunities.

AIRPURE™ Personal Medallion

The stylish Personal Medallion operates on negative ion technology to remove second-hand smoke, purify air, remove particles and kill microbes.

This personal, portable, and wearable air purifying medallion cleans and disinfects the immediate breathing air of the user. Unlike a face covering which may prevent aerosol transmission of the coronavirus, the Personal Medallion “awards” both the user and a bystander who fails to maintain social distancing with only an exchange of clean air.

AIRPURE™ Personal Medallion

Smart microchip technology controls negative ion stable release, purified air circulation, and breathes freely.

Specifications

1. SIZE: 2.17in x 2.36in x .79in
2. USB Charge: Ultra-fast 30 min charge for full-day use
3. Dual ion exhaust
4. Stainless-Steel Necklace
5. One-Touch User Interface
6. Stylish brush Metallic texture
7. Comes in Black or White

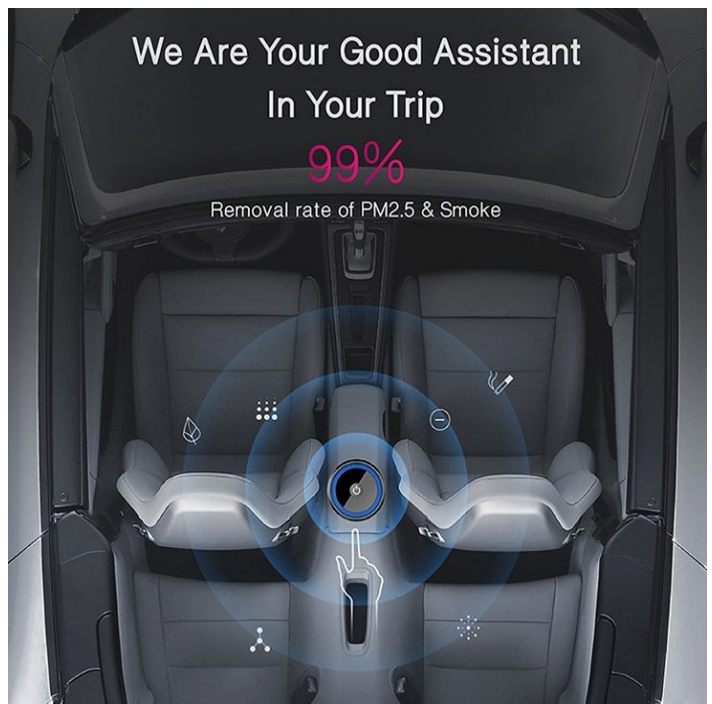

The #3 Way To Breathe Easier... **AIRPURE™ Car Canister**

This discrete small footprint air purifying vessel cleans and disinfects the entire passenger compartment of the users automobile. This device removes the uncertainty of riding in rideshare, taxi or rental vehicle service.

The confidence and safety this provides to clear a vehicle of smoke, allergens, and odors more effective than face coverings and disinfectant sprays for air quality.

The AIRPURE™ Car Canister operates on DC car voltage and eliminates dust, microbes, particles, and smoke while providing cleaning natural aromatic air.

AIRPURE™ Car Canister

Designed specifically to solve the close quarter air quality concerns that can not be solved by social distancing in the average automobile.

Specifications

1. SIZE: 2.17in x 2.36in x .79in
2. Dual USB Charge: Ultra-fast 30 min charge for full-day use
3. Low Noise
4. Aluminum Alloy
5. One-Touch User Interface
6. Stylish, and discrete in multiple color options

AIRPURE™

Easy. Cost Effective. Innovative. The AIRPURE™ Solution

The AIRPURE™ solution has shown you three ways to help your organization breathe easier during the pandemic. Our offering focuses on the direct cause with the most effective means and cutting-edge technology.

The AIRPURE™ solution is easy and cost effective to use and most importantly it helps ensure business continuity, safety compliance, increased productivity and shows that you put the people internally and externally involved with your organization first.

The organization that pivots to this solution wins.
