

Prescription Fentanyl vs. Illegally Manufactured Fentanyl

Prescription Fentanyl

96%
of overdose deaths in children 17 and under are caused by fentanyl poisoning.

Illegally Manufactured Fentanyl

ILLEGAL DRUGS DO NOT COME WITH AN INGREDIENTS LIST. MANY CONTAIN DEADLY DOSES OF FENTANYL.

Fentanyl is a synthetic opioid that is up to **50x** stronger than heroin and **100x** stronger than morphine.

WARNING: Most of the fentanyl consumed by young adults and teenagers is in the form of counterfeit pills. Criminal drug networks are mass-producing counterfeit pills and falsely marketing them as legitimate prescription pills to deceive the American public. 6 out of 10 counterfeit pills contain a lethal dose of illegally manufactured fentanyl.

Decoding Emojis

It's not uncommon for today's teens to have entire conversations via emojis making it easy to dupe parents and keep the true meaning of their conversation hidden.

Whether your child is using words or emojis, here are some of the current ways illegally manufactured fentanyl is referred to:

DEALER SIGNALS
