We Install, Train, Service and Repair Machine Tools.

We Install, Train, Service and Repair all types of Machine Tools. GANESH, Sharp, Chevalier, Femco. We are factory trained and have over 35-year experience. We specialize in GANESH GEN-MILL and GEN-TURN CNC Mills, CNC Lathes, Manual Mills and Manual Lathes. Fanuc, Mitsubishi and SYNTEC CNC Controls.

Installation and Training:

We install, Level and train. We specialize on the GANESH Cyclone Series, CS, GTS, GT, NCY, KSL, MSY and TTM Y Machines with Fanuc, Mitsubishi and SYNTEC CNC Controls.

Maintenance and Repair:

If your machine is not working properly, we can trouble shoot and repair Electrical, Mechanical, Hydraulic and Pneumatic systems. We understand schematics of all kinds and can read and write Ladder Logic. We can service Fanuc, Mitsubishi and SYNTEC CNC Controls.

Preventative Maintenance:

We offer a Preventative Maintenance Program to help limit equipment break down.

- We inspect and test each Axis, Spindles, Leadscrews, Ball Screws, bed Ways, linear guides for excessive run out and backlash.
- We ensure the lubrication, Hydraulic and Pneumatic system are operating and dispensing properly and that all fluid levels are filled and free of contaminants.
- We check all electrical components (wiring, switches, motors, drives, contactors and overloads) to ensure they are free from defects and operating properly.
- At the end of the service we will provide you with a complete diagnostic report detailing the findings and necessary repairs.

CNC Probes:

We install and Train on use and operations of Machines tool Probe Systems for both Machining centers and Turning centers.

Thank You
David Smith
