

Steps to Flawless Credit

STEP 1

Set up and complete your discovery call. On this call you will assess the current state of your most recent credit report and discuss your goals for repairing your credit.

STEP 2

After assessment, our dispute team will begin the challenge and dispute process. During this process we ask the bureaus and creditors to verify these items as accurate and fair. If they can't verify them as accurate and fair, they are required to remove them.

STEP 3

We will complete the challenge and dispute process on an as needed basis in order to remove the negative items to the best of our ability.

STEP 4

As you work to remove the negative items from your credit report, it is important to manage and maintain healthy credit habits while completing this process. (i.e. Pay down credit cards, no new collections, etc.)
