Problem

Crypto trading today is fragmented, too many apps, dashboards, and steps

Social sentiment drives most trading decisions, yet there is no seamless way to act on these signals instantly.

This friction creates lost opportunities, slower reactions, and reduced engagement for traders.

WHY NOW?

- X (formerly Twitter) has become the global hub for crypto conversations, memes, and trading signals.
- The rise of AI, retail trading, and DeFi is converging with social media at scale.
- Users increasingly expect mobile-first, conversational, and frictionless trading experiences.
- The timing is ideal to build the first native trading layer inside X.

SOLUTION- VOOVO APP

SOCIAL TRADING BOT

- Voovo App is the first social trading bot built natively for X.

TRADE VIA DM

- allows users to execute trades directly from their timeline, replies, or DMs.
- Powered by xAI for natural language trading such as:
 - "Buy 2 SOL now"
 - "Show SOL trend last 24h"

NO EXTRA APPS, NO FRICTION

- No extra apps, no friction – just trade like texting.

Product Demo

HOW IT WORKS:

- USER SEES A POST ON X
 - REPLIES "BUY 2 SOL"
 - VOOVO CONFIRMS + EXECUTES INSTANTLY.
- TRADE RECEIPT + SHARABLE TRADING CARD APPEARS IN TIMELINE.

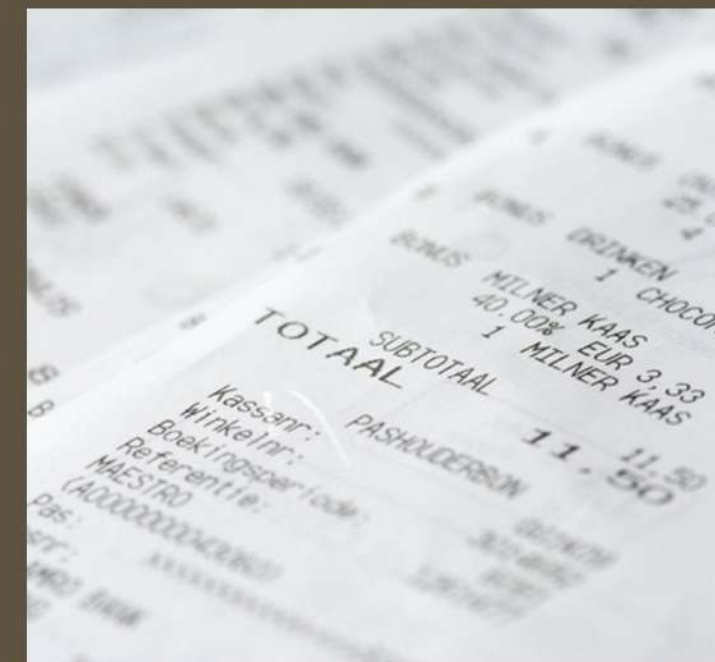

1: Watch out for posts on X

-> replies: "Buy 2 SOL"

→ Voovo confirms + executes instantly

2: Trade receipt + sharable trading card appears in timeline.

Market opportunity

Total Available Market (TAM)Crypto Trading Market

Crypto Trading Market:

\$1.5T daily volume

Social Trading Market

Social trading market:

\$2.2B (2024), growing at 20% CAGR

X User Base

X user base:

500M monthly active users, most crypto-native

Voovo Sweet Spot

Huge overlap:

where crypto culture lives is where Voovo sits

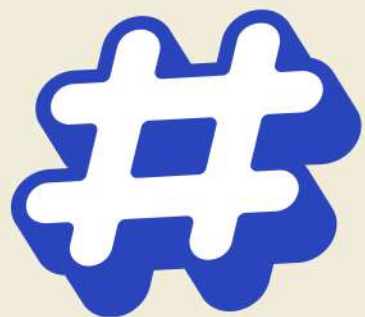

UNIQUENESS

- First-mover advantage: No other trading platform is natively integrated with X.
- Frictionless flow: From discovery → sentiment → execution, all within one platform.
- Social-first design: Trading becomes as casual and engaging as liking or retweeting.
- Broad accessibility: Appeals to both crypto newcomers and experienced traders.

TECHNOLOGY

- NLP engine → converts casual chat into precise trading commands

- Sentiment analysis → mines X posts, hashtags, influencers for bullish/bearish signals

- Secure API middleware → executes trades on CEX/DEX with encryption

- Solana-first execution → ultra-fast, low fees, scalable social trading layer
- Gamification layer → squads, leaderboards,

COMPETITIVE LANDSCAPE

1

Current players: eToro,
Copytrader,
TradingView

2

Limitations: external
dashboards, not
integrated into X, slow UX

3

Voovo edge:

- Native to X social feed
- xAI-powered instant trading
- Solana speed + scalability

TRACTION/PILOT

1.EARLY USERS FRIENDLY

- Prototype in beta with early users

2.COMMUNITY-DRIVEN

- Community-driven marketing with \$VOOVO native token

3.PARTNERSHIPS

- Partnerships in discussion with Solana ecosystem projects

BUSINESS MODEL

- Trading fee spread (micro-percentage per transaction)
- Premium AI Copilot subscription (advanced trading suggestions)
- Social trading rewards and leaderboards engagement = monetization
- Future: \$VOOVO native token (governance, rewards, staking) cross-chain.

ROADMAP

- looking into the future of Voovo App

2025 Q4
-> Launch Voovo App
Beta on Solana

2026 Q1
-> Copy-trading squads +
leaderboard gamification

2026 Q2
→ Multi-chain
expansion (ETH L2s,
BTC Lightning, BSC)

2026+
-> DAO governance
via \$V00V0

NTT'S STRENGTHS

- Global ICT infrastructure, data networks, and enterprise solutions.
- Deep expertise in AI, cybersecurity, and compliance frameworks.

PARTNERSHIP VALUE

- AI Signal Detection at Scale → NTT's data capabilities strengthen Voovo's real-time sentiment and market analysis.
- Enterprise Security & Compliance → Access to NTT frameworks ensures regulatory readiness and user trust.
- Global Reach → NTT's infrastructure enables Voovo to scale internationally faster.

FUTURE VISION

- Joint innovation in AI × FinTech × Social Media domains.
- Pioneering new use cases in enterprise-backed, AI-driven social trading.

**SYNERGY
WITH NTT**

the ASK

Funding Requirement

- Raising \$X to accelerate
- Product development & feature expansion
- User acquisition & community growth
- Solana-first rollout with multi-chain expansion

Strategic Partnership with NTT

- Collaborate with NTT to scale AI infrastructure and ensure enterprise-grade security.
- Leverage NTT's global network to support international growth.

\$VOOVO

The native token for Voovo App

With the right capital and
NTT's partnership, Voovo
can become the category
defining leader in AI
driven social finance.

Launched Fairly on Pump.Fun.
Graduated with Liquidity Locked.
Community Governance.
