

# Payanywhere is the payments platform for powering your business.

With point of sale software, hardware, and business management tools, you've got everything you need to accept credit card payments, sell more to your customers, and keep your employees organized.

## The Payanywhere app

The easy-to-use point of sale software for iOS, Android, and Payanywhere Smart Solutions.

### Accept payments

Accept EMV chip and magstripe cards, NFC contactless, and offline payments in your store or on the go.

### Tips and signatures

Create preset tip amounts by percentage or dollar. Have customers sign and tip on screen or on a paper receipt.

### Two unique themes

Use Terminal theme to mirror a traditional credit card terminal. For inventory management, stock tracking, and open tabs, use Retail theme.

### Tickets & tabs

Open a ticket, start a tab, and close out when your customers are ready.

## Payments Hub

Your online hub to access data and business management tools.

### Accept online payments

Send recurring invoices, allow customers to enable autopay, and accept credit cards right from a virtual terminal.

### Run your business

Set up employees with varying permission levels. Build and manage your inventory. View customer ratings, prevent chargebacks, and manage your account.

### View activity

View real time data for sales, items, customers, and employees. Sort, filter, run comparisons, and export detailed reports.

# Choose the hardware best suited to your business.

**3-in-1 Reader**  
Pair to mobile device

**Smart Mini**
