## Product Description:

Pro-SealECCO NanoCrete<sup>®</sup> G is a Miso inorganic, Nano anionic, infused polymer. This material to be used only with Pro-Seal XXWCrete<sup>®</sup> G, Pro-SealECCO BedR.O.C.<sup>®</sup> G, Pro-SealECCO TopR.O.C.<sup>®</sup> G and other G components, as a component of the Pro-SealECCO System<sup>®</sup> G to rapidly produce and stabilize landfill and methane soils, to repel water to avoid water saturation, liquefaction, washouts of treated waste and methane soils. The Pro-SealECCO<sup>®</sup> System is mixed in situ with the target soils. This process is highly cost effective when it is properly integrated as a system with target waste and methane soils.
