Manufactured: Collected: 06/06/2025, 12:00 pm Received: 06/09/2025 Completed: 06/13/2025 Batch#: 250117-001

Black Labs Lic. # 00000019LCFV63662604 9030 S Rita Rd #320 Tucson, AZ 85747

B 1	Potency testing, is below the limit of quantitation
B 2	Below the maximum allowable concentration
D1	The limit of quantitation and the sample results were adjusted to reflect sample dilution
11	The relative intensity of a characteristic ion in a sample analyte exceeded the acceptance criteria in subsection (L)(1) with respect to the reference spectra, indicating interference
L1	When testing for pesticides, fungicides, growth regulators, mycotoxins, heavy metals, or residual solvents, the percent recovery of a laboratory control sample is greater than the acceptance limits in subsection (KJ(2)(c), but the sample's target analytes were not detected above the maximum allowable concentrations in Table 3.1 for the analytes in the sample
М1	The recovery of the matrix spike was high, but the recovery from the laboratory control sample in subsection (K)(2) was within acceptance criteria
M 2	The recovery of the matrix spike was low, but the recovery from the laboratory control sample in subsection (K)(2) was within acceptance criteria
М3	Unusable because the analyte concentration was disproportionate to the spike level, but the recovery from the laboratory control sample in subsection (K)(2) was within acceptance criteria
М4	The analysis of a spiked sample required a dilution such that the spike recovery calculation does not provide useful information, but the recovery from the associated laboratory control sample in subsection (K)(2) was within acceptance criteria
М5	The analyte concentration was determined by the method of standard addition, in which the standard is added directly to the aliquots of the analyzed sample
N1	A description of the variance is described in the final report of testing according to R9-17-404.06(B)(3)(d)(ii)
R 1	The relative percent difference for the laboratory control sample and duplicate exceeded the limit in subsection (K)(3), but the recovery in subsection (K)(2) was within acceptance criteria
R2	The relative percent difference for a sample and duplicate exceeded the limit in subsection
V 1	The recovery from initial or continuing calibration verification standards is greater than the acceptance limits in subsection (H)(2) or (J)(1)(b) as applicable, but the sample's target analytes were not detected above the maximum allowable concentrations in Table 3.1 for the analytes in the sample
Q1	Sample integrity was not maintained
Q2	The sample is heterogeneous, and sample homogeneity could not be readily achieved using routine laboratory practices
Q3	Testing result is for informational purposes only and cannot be used to satisfy dispensary testing requirements in R9-17-317.01(A) or labeling requirements in R9-17-317
