RePower Electric Corp acquires ZEVx Inc. Electric Vehicle Conversion IP & Patent Portfolio

Gilbert AZ: RePower Electric Corp announced today that it has acquired the entire ZEVx IP and patent portfolio from ZEVx Liquidators LLC effective immediately. With this strategic investment, RePower Electric Corp significantly strengthens its EV Conversion, and Battery Management technology.

The acquired portfolio consists of all IP trade secrets, trademarks, copyrights, software repositories, and CARB EO certificates on file, along with a robust list of issued and pending patents.

*“Having acquired the full ZEVx IP and Patent portfolio ensures Repower can and will build on the extensive hardware, software, battery management technologies, and trade secrets that established ZEVx as a premier provider of repower kits for class 3 - 5 fleet vehicles. We are very excited to bring these solutions back into the market with full CARB certification on our E-Series Platform.” **Al Snyder, Founder and CEO***

*“Returning the IP and data to the individuals who developed it will allow quicker time to market and serve as a solid platform for improvements in the first RPEC release. Having the CARB certification along with our rapid time to manufacture ensures we will be able to meet customer demand for our E-Series Shuttle Bus release without restriction.” **Damon Kuhn, Founder and CTO***

About RePower Electric Corp:

Repower Electric Corp is committed to revolutionizing the Shuttle Bus industry by offering innovative electric vehicle conversions. Replacing internal combustion engines, exhaust systems, and all associated fluid driven ancillary components with high density EV battery packs, electric motors, and drive systems. We strive for a future where every fleet operates on sustainable energy, driving change for a better tomorrow.
