

Struck by Hazards

Course Description

This course is part of OSHA's Focus Four topics, Struck-By Hazards in the Construction industry.

The course starts by diving into the fundamental concepts of struck-by hazards on construction sites, their prevalence, and the importance of recognizing them to ensure safety.

You will then get to review various types of struck-by hazards and examples.

Nearly all struck by injuries are preventable. You will get to review protective measures, safe work practices, and the use of personal protective equipment to prevent struck-by injuries on the job site.

Finally, you will learn about the responsibilities that employers must protect workers from struck-by hazards, the necessary training requirements.

You will learn that when employers follow all of this guidance for protecting workers from Struck By hazards, workers are much less likely to sustain a workplace injury.

Learning Objectives

By the end of this course you will:

- Have an understanding of the concepts of struck-by hazards on construction sites, their prevalence, and the importance of recognizing them to ensure safety.
- Learn about the various types of struck-by hazards, and review statistics to understand the gravity of these hazards in the construction industry.
- Understand about the protective measures, safe work practices, and the use of personal protective equipment to prevent struck-by injuries on the job site.
- Have an understanding about the responsibilities that employers must do to protect workers from struck-by hazards, and the necessary training requirements that employers must provide to workers.

Target Audience

This course is aimed at anyone working in the construction industry, particularly those on busy sites or the supervisors and managers who will need to understand.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Further Progression

This course forms part of the OSHA focus four package along with Caught in/ between hazards, Fall Protection and Electrocution Hazards.

Modules

Course	Module Number	Module Name	Pass % Required
