

# Slips, Trips and Falls

## Course Description

This course covers Slips, Trips, and Falls, the injuries they can cause in the workplace, and the safety controls and systems that can be put in place.

The course starts by describing the relevant Slips, trips and falls laws, and how OSHA sets federal standards for hazard identification, prevention, and compliance.

You'll learn about the main risk control areas and you'll be shown how to select the right non-slip sole treads and the most effective depths and patterns.

You'll see how to create a slips, trips and falls map as a way of identifying hazards and developing safety controls.

There'll be expert advice on the practicalities of estimating slip risks on flooring, including testing.

You'll learn about Management's crucial part in devising Slips, trips and falls safety initiatives, including maintenance, cleaning, the use of warning signs and barriers and the introduction of fall protection equipment.

Other important information covers employee responsibilities and how they should look after themselves and their colleagues, while reducing slips, trips and falls accidents through workplace housekeeping.

Finally, we'll help you understand the human factors that can cause slips, trips and falls, including physical characteristics, such as age, strength and physical fitness, and negative attitudes, such as complacency and overconfidence.

## Learning Objectives

By the end of this course, you will be able to:

- Have an understanding of Slips, Trips, and Falls hazards along with statistics/costs in terms of individuals, organisations, and national level.
- Learn about slips, trips, and falls mapping and measuring slip risk.
- Understand how to control slips, trips, and falls, along with employee responsibilities, housekeeping, design and maintenance, and the human factor.
- Learn about the aspects of the management of slips trips and falls.

## Target Audience

This course is aimed at anyone in the workplace.

## Advantages

Understanding Slips, Trips, and Falls hazards and how to control slips, trips, and falls, along with employee responsibilities, housekeeping, design and maintenance, and the human factor.

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

### Further Progression

For those needing further safety training, courses such as PPE and Working safely should be completed alongside this one.

For Supervisors that want to continue to enhance their skills, courses such as Introduction to Risk Assessment or Leadership Skills would make great next steps.

### Modules

Course	Module Number	Module Name	Pass % Required
Slips, Trips and Falls	1	Introduction	70
Slips, Trips and Falls	2	Risk Controls	70
Slips, Trips and Falls	3	Management Actions and Employee Responsibilities	70
Slips, Trips and Falls	4	Managing Health & Safety	70

### Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

**Duration:** 35 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions.*)
