

# OSHA 10 – Construction

## Course Description

Our full suite of interactive video-based online courses can be white labelled and distributed by you.

This online course will instruct you on construction-specific safety measures as outlined in OSHA 29 CFR 1926. Upon passing, you can immediately download your certificate of completion.

Specifically, you will learn best practices for preventing the leading causes of fatalities and accidents in construction.

This online course emphasizes hazard identification and covers methods to prevent slipping, tripping, being struck by objects, electrocution, and getting caught between objects or machinery.

Additionally, you will gain insights into your employer's responsibilities for workplace safety and your rights under OSHA, including how to file a complaint if your workplace fails to meet safety standards.

**This OSHA 10 course reviews information from OSHA 29 CFR 1926.**

## Target Audience

This online OSHA 10 Construction course is designed for entry level construction workers and employees who need OSHA 10 Construction Training to obtain or retain employment. This course is ideal for:

- Construction workers
- Foremen
- Job supervisors
- Construction site inspectors
- Personnel responsible for construction-related projects

This course is not designed for employers and employees in the General industry.

## Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.
