

OSHA Focus Four

Course Description

Our full suite of interactive video-based online courses can be white labelled and distributed by you.

Construction workers face various hazards at their job sites daily. However, OSHA has identified four primary hazards, known as the Focus Four: fall hazards, struck-by hazards, caught-in or between hazards, and electrocution hazards.

Tragically, these hazards often lead to severe injuries or even fatalities. However, through training, we can significantly reduce the occurrence of such incidents and foster safer work environments.

This online course contains engaging modules to address the core hazards of falls, electrocution, struck by incidents, and caught-in/between scenarios prevalent in construction environments and aims to equip you with the knowledge and skills necessary to recognize, avoid, and mitigate these dangers effectively.

Participants will receive a certificate of completion upon finishing the training.

Target Audience

This OSHA Focus Four Hazards online course is suitable for construction industry workers and anyone who might encounter these risks while working. These courses are recommended for:

- Workers
- Managers
- Foremen
- Supervisors
- Individuals with construction safety duties

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
