

OSHA 10 – General Industry

Course Description

Our full suite of interactive video-based online courses can be white labelled and distributed by you.

This OSHA 10 General Industry online course serves as an essential introduction to occupational safety and health for entry-level employees.

This program is part of OSHA Training initiative aimed at promoting understanding of safety protocols as outlined in OSHA 29 CFR 1910, and it focuses on enhancing safety in the workplace.

In this training programme, you will explore OSHA's recommended strategies for minimizing risks and preventing injuries.

The course also covers key risks present in general industry settings and the methods for identifying, managing, and safeguarding against them.

This OSHA 10 course reviews information from OSHA 29 CFR 1910

Target Audience

This online OSHA 10 General Industry course is tailored for individuals seeking comprehensive knowledge on a broad range of safety subjects relevant to various roles within the industry. This course provides essential safety information that is applicable across numerous sectors. This course is particularly advantageous for:

- General industry workers
- Warehousing and manufacturing employees
- Job supervisors
- Inspectors involved in general industry activities

This course is not designed for employers and employees in the construction industry.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.
