

# Eye and Face Protection

## Course Description

This course provides you with an introduction to eye and face protection in the workplace.

The course starts with some eye and face injury statistics, then turns to the key steps involved in conducting a PPE hazard assessment for eye and face protection.

Following this, the course covers the four main groups of PPE that protect against eye and face injuries, detailing the features and benefits of each.

Next, it looks at some common workplace hazards that can lead to eye and face injuries and outlines the appropriate PPE for each situation. Finally, the course finishes by setting out the steps you should take were an eye or face emergency to occur in your place of work.

## Learning Objectives

By the end of this course you will be able to:

- Learn how to conduct a PPE Hazard Assessment.
- Learn about Eye and Face injury statistics.
- Learn about the four main groups of PPE with respect to eye and face injuries, and describe their features and benefits.
- Understand about the appropriate PPE for Common Workplace Hazards.

## Target Audience

This course is aimed at anyone working where there is potential for eye and face related hazards

## Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

.

## Further Progression

For a wider view on types of PPE and their uses please view our Personal Protective Equipment course.

## Modules

Course	Module Number	Module Name	Pass % Required
Eye and Face Protection	1	Eye & Face Injury Statistics & PPE Hazard Assessment	70
Eye and Face Protection	2	Personal Protective Equipment	70
Eye and Face Protection	3	Appropriate PPE for Common Workplace Hazards	70
