

Scaffolding for Construction

Course Description

This course starts by reviewing the fundamentals of scaffolding, where we address the core components, from crucial safety regulations to proper maintenance procedures. This segment is tailored to provide construction workers with the skills needed for safe and productive work practice around scaffolding.

Following this, the course covers the vital competencies required for the safe assembly and disassembly of scaffolding structures. Our guidance will navigate you through the necessary procedures, emphasizing the assurance of structural integrity and adherence to comprehensive safety standards at every stage.

Target Audience

This course is aimed at anyone working in the construction industry, particularly those on busy sites that use scaffolding.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Further Progression

For those needing further safety in training, courses such as Fall Protection, Hand and Power Tools and PPE should be completed alongside this one.

Modules

Course	Module Number	Module Name	Pass % Required
Scaffolding for Construction	1	Introduction to Construction Scaffolding	70
Scaffolding for Construction	2	Practical Application and Safety Measures	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 30 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions*).
