

# Emergency Evacuation

## Course Description

The course will start by looking at emergencies, both natural and manmade, from fires and explosions, to hazardous chemicals and earthquakes.

You'll learn how to write an Emergency Evacuation Plan, including evaluating the emergency, determining escape routes, "Refuge Areas", and Muster Points, along with the location of fire extinguishers, first aid kits, and spill kits.

We'll cover staff responsibilities, along with OSHA best practices, including alarm, sprinkler and smoke detection systems, and adequate signage and lighting.

You'll learn how to best attend to injured people and communicate effectively with medical professionals and emergency services.

The course covers why it's important to have appropriate personal protective equipment readily available during an emergency.

There's important advice on how to shut down gas, electrical systems or other critical equipment, and the course covers training exercises, evacuation drills, and alarm testing.

We'll examine hazardous spills, and a seven-step approach to dealing with the problem safely and effectively.

Finally, we'll cover medical emergencies, including the use of Medevac Plans.

## Learning Objectives

By the end of this course, you will be able to:

- Write an effective Emergency Evacuation Plan (EAP)
- Follow proper emergency evacuation procedures
- Handle special emergencies – such as employees with special needs.
- Respond safely and effectively to hazardous chemical spills
- Organize, or take part in, emergency evacuation drills

## Target Audience

This course is aimed at managers and supervisors who may be responsible for coming up with, deploying and executing emergency evacuation plans. It's also relevant to employees that will need to understand why the plans are so important to understand and follow.

## Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

## Modules

Course	Module Number	Module Name	Pass % Required
Emergency Evacuation	1	Introduction	70
Emergency Evacuation	2	Writing an Emergency Evacuation Plan - Part 1	70
Emergency Evacuation	3	Writing an Emergency Evacuation Plan - Part 2	70
Emergency Evacuation	4	Training, Drills and Testing	70
Emergency Evacuation	5	Hazardous Spills	70

### Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

**Duration:** 45 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions).*
