

Telehandlers

Course Description

Welcome to our complete training course on Telehandlers, focusing on their safe operation.

We'll start with the basic features of telehandlers, their classification as Class VII powered industrial trucks for rough terrain, and what's needed for operator certification.

Next, explore the two primary types of telehandlers—rotating and heavy lift or standard fixed. We'll discuss how to choose the right type for different work environments.

Learn about the OSHA standards that apply to telehandlers, the thorough training operators must undergo, and the essential equipment needed for safe use.

Finally, discover the common hazards like tip-overs and collisions, and learn the best practices for handling loads safely to prevent these dangers.

Learning Objectives

When you have completed this course you will:

- Know the basic features of telehandlers, their category as a type of heavy-duty vehicle for uneven surfaces, and the necessary certification for operators.
- Explore the two primary kinds of telehandlers—rotating and heavy lift or standard fixed. Understand when to use each type based on different job site conditions.
- Examine the relevant safety standards for telehandlers, the necessary operator training, and the essential equipment for safe use.
- Understand the key dangers of operating a telehandler, such as tipping over and crashing, along with the top methods for safely managing and transporting loads to prevent these issues.

Target Audience

This course is designed for individuals in the workplace who require the use of telehandlers to perform tasks that may involve or generate hazardous conditions. It is intended for operators needing training to use telehandlers safely and their supervisors or managers who must ensure that these machines are operated correctly.

Advantages

You will discover how to safely use and upkeep a telehandler, making your jobsite more secure as a result.

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life

Approved to US federal and OSHA standards.

Further Progression

Other courses that complement this one could include Health Hazards in Construction, Pallet Jacks and Aerial Scissor Lifts.

Modules

Course	Module Number	Module Name	Pass % Required
Telehandlers	1	Introduction to Telehandlers	70
Telehandlers	2	Types of Telehandlers and When to Use	70
Telehandlers	3	Compliance with OSHA Standards	70
Telehandlers	4	Handling Telehandler Hazards and Safe Operation	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 25 minutes (*Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions*).
