

PROGRESS?

C.E. Warner 4-6-24

**Evolution's nature requires it's chance,
Status Quo bends to physics' selection.
Organisms advance, future to enhance.
Earth answers to universes' direction.**

**Man follows nature's predatory course.
What he thinks, he is entitled to achieve.
No care about law universe will enforce.
Master of his destiny only believe.**

**End is the ultimate prize, who cares price?
Nuclear war, gas cars, atmosphere burns,
Genocide, allow any vice.
Arrogant men ignore natures returns.**

**A.I. is mankind's ultimate foolish game,
Nature purges Earth in selection's flame.**
