icon cloud solutions

OpenTouch™ Office Cloud

Cloud-based communications designed for businesses with up to 50 employees.

OTOC uses the same software and feature set as the premises version of the product enabling hundreds of customer-centric features.

Enable advanced unified communication services on Apple® iPhone™ and Google Android® mobile devices.

Call management. Route calls to your mobile phone while away from the office.

Remote office. Easily deploy communications at remote or home offices.

Have in-conversation features via Smartphone. See status of co-worker, access company directory, play voice messages.

Flexible Options

Conferencing. A simple and easy way to conduct a 6-party conference call.

Dial by name. Dial and search contacts by name using a standard QWERTY keyboard from deskphone.

Personalized features. Choose the features and options that best suit your business.

Dedicated customer instance. Eliminate service disruptions because of upgrades or bottlenecks to other customers.

Off-Site Mobility

Key Features

Hosted voice system with 100's of telephony features.

Auto attendant. Intelligently route calls to the best person or department.

Interoffice paging. Access paging system from any extension.

Synchronous ringing. Your phone number can ring on one or many devices at the same time.
