U.S. House Cleaning Needed

We are building a national movement to restore the U.S. House of Representatives to its original constitutional purpose, which is to represent the interests, needs, and desires of the Citizens of this great country.

Instead of representing us, it has become a representative of the interests of foreign governments, foreign citizens, our politicians, our military, our government, big business, the global elite, the WEF, the WHO, basically everyone except us.

We want to replace every politician in the House of Representatives with an actual representative of the working class. Someone who knows hard work, raising a family, and what it takes to just survive in today's world.

If you or anyone you know has what it takes to help others and is willing to get involved, please have them check out our website at Vote99pct.org. Elected representatives can be as young as age 25, this is your future at stake.
